

**POWERFUL TECHNOLOGY. AFFORDABLE GROWTH.**  
Small-to-Mid-sized Business Communications Solution

**OfficeServ™ 7200-S**

## OFFICE CONFIGURATION

With email gateway, voicemails can be received and listened to on your PC or SmartPhone as emails with “.wav” attachments.

### Basic Features

- Accommodates a wide range of digital, IP, and wireless phones to suit your business needs
- Built-in reporting functionality for monitoring call statistics
- Auto Attendant with Uniform Call Distribution (UCD) for efficient call handling
- Embedded voicemail with email gateway to deliver voice messages to your MS Outlook Inbox

### Advanced Features

- SPNet enables networking to other **OfficeServ** platforms at remote offices
- **Office Connect** allows your desk phone and mobile phone to ring simultaneously and gives you the ability to transfer, conference, and put calls on hold from your mobile phone
- Hot Desking lets individual employees have alternate work areas, or multiple employees share a common work area
- Enhance on and off-site productivity with a suite of Computer Telephony Integration (CTI) applications, which help improve cost efficiency and streamline operations
- Wireless Access Points allow wireless handsets and PDAs to integrate seamlessly with phone system features

### WITH SIP TRUNKING, THE SYSTEM CAN PAY FOR ITSELF

Looking for a rapid return on investment in tangible dollars and cents— such as savings on every phone bill? By utilizing Session Initiation Protocol (SIP) trunking, you can take advantage of VoIP technology to reduce recurring phone carrier charges; which means the system can pay for itself over time. SIP trunking also increases capability and productivity by letting you extend your network beyond the walls of your business.

Samsung levels the playing field for small-to-midsized businesses by making enterprise-quality telecommunications more accessible and affordable. That’s the Samsung mission. For flexible, economical and incremental growth, choose the Samsung **OfficeServ 7200-S**... and connect with The Samsung Advantage.

## ECONOMICAL, FLEXIBLE AND INCREMENTAL GROWTH FOR TODAY'S BUSINESSES

Phone systems designed for businesses like yours leave you with difficult choices – especially regarding growth. Capacity ranges never reflect the utilization or expansion you expect. No size ever fits right. So, you're left with the same old challenge: Do you overspend now, and overbuy capacity to accommodate possible expansion tomorrow, or do you buy within budget and expand later, hoping not to outgrow your system too soon?

Now you don't have to compromise. Samsung presents the **OfficeServ™ 7200-S**, a converged solution that is expandable in smaller increments to grow in pace with your business. It has all the power and versatility you need at a size and price that's right for you.

### DIGITAL, VoIP, AND WIRELESS

Choose from a broad range of Samsung digital and VoIP phones—with large, easy-to-read displays—that were designed to complement the **OfficeServ 7200-S** system. For uninterrupted productivity even when you're on the move, take advantage of Samsung's affordable wireless mobility solution.

Talk to your authorized dealer about which phones are right for your business.

### AFFORDABLE TODAY; EXPANDABLE TOMORROW

The big story behind the Samsung **OfficeServ 7200-S** is flexible and incremental growth. That's what sets it apart from other systems. You can easily add expansion cards to build out the system line by line without having to spend for excess capacity. This is true flexibility and affordability, the hallmark of Samsung engineering.

The system's adept main processor provides significant voice and data muscle to run your business with ease and efficiency. And it's affordable to operate. Equipped to handle the latest SIP service technology, the **OfficeServ 7200-S** can save you money on your monthly phone bills by reducing recurring carrier charges. VoIP and VPN optimization mean you can take advantage of today's more affordable Voice over Internet Protocol technology, and you can easily set up and administrate a Virtual Private Network. Moreover, unlike other systems, here email, voicemail and a media gateway come embedded, so you won't need to purchase a separate processor or use up valuable spare capacity.

### TECHNOLOGY ON THE MOVE – JUST LIKE YOU

The Samsung **OfficeServ 7200-S** comes with wireless capabilities, so employees can move about the office using lightweight portable handsets. You can also set up WiFi, making wireless access to data even easier. When employees are on the road, the system's **OfficeServ Connect** feature can allow office calls to ring simultaneously at multiple locations – on their mobile devices, in their home offices, or wherever there's a phone. In addition, SoftPhone technology can virtually turn the laptops of road warriors into full-featured office phones.
