Appendix - Menu Structure	180

Before You Begin

This guide provides information you need to quickly use your new phone.

Firstly, verify with your system administrator that the IP network is ready for phone configuration. Also, be sure to read the Quick Start Guide which can be found in your phone package before you set up and use the phone. As you read this guide, keep in mind that some features are only configurable by your system administrator or determined by your phone environment. As a result, some features may not be enabled or may be operated differently on your phone. Additionally, the examples and graphics in this guide may not directly reflect what is displayed or is available on your phone screen.

Note: This guide mainly takes T58A phones as an example.

Related Documentation

You can view more types of documents to make the phone to perform more functions.

You can obtain additional information on the following phones from Yealink Support:

- [Flagship Smart Video Phone VP59](#)
- [Smart Business Phone T58A](#)

The following types of related documents are available on each support page on [Yealink support page](#):

- Release Notes, which details bug fixes and feature enhancements when an update is released.
- Quick Start Guide, which describes how to assemble your phone and configure the basic phone features.
- Wall Mount Installation Guide, which provides detailed instructions on how to use an optional wall mount bracket to mount your phone on the wall. It is only applicable to T58A phones.
- Administrator Guide, which provides detailed information on how to configure phone features for the system administrator.
- Regulatory Notice, which provides information about all regulatory and safety guidance.

You can also view other user documents which provide descriptions and examples for phone settings and features on the [Yealink support page](#).

Summary of Changes

This section describes the changes to this guide for each release and guide version.

Changes for Release V85, Guide Version V85.1

The following sections are new for this version:

- [Wireless Access Point](#)
- [Creating a Multi-party Conference with a Conference Key](#)
- [Using Your Phone with PSTN Account](#)
- [Pairing and Connecting two Bluetooth Devices](#)

Major updates have occurred to the following sections:

- [Control Center and Notification Center](#)
- [Icons in the Status Bar](#)
- [Wireless Network](#)
- [Using DECT Handsets with Your Phone](#)

Getting Started

Before you use your phone, take some time to get familiar with its features and user interface.

The terms "the phone" and "your phone" refer to any of the IP phones. Unless specifically noted in this guide, all phone models are operated in similar ways.

11	Keypad	Provides the digits and special characters in context-sensitive applications.
12	Speaker	Provides hands-free (speakerphone) audio output.
13	Reversible Tab	Secures the handset in the handset cradle when the phone is mounted vertically. For more information on how to adjust the reversible tab, refer to Yealink Wall Mount Quick Install-

No.	Item	Description
		ation Guide for Yealink IP Phones.
14	Hookswitch	<ul style="list-style-type: none"> • Picking up the handset from the handset cradle, the hookswitch bounces and the phone connects to the line. • Laying the handset down on the handset cradle, the phone disconnects from the line.
15	Camera Lens	2 Mega-pixel camera. Provides near-site video. The better distance between camera and images you want to capture should be in the range of 0.35 meters (1 foot) to 2 meters (6 feet).
16	Camera LED Indicator	Indicates video call status and camera status.
17	Privacy Shutter	Covers and uncovers the camera. When the camera is switched off, the video image is black.
18	USB2.0 Port	Allows you to connect an optional USB device (for example, USB flash drive) to your phone.

Power LED Indicator

The power LED indicator indicates the call and message status.

LED Status	Description
Solid red	The phone is initializing.
Fast-flashing red (0.3s)	The phone is ringing.
Slowly-flashing red (1s)	The phone receives a voice mail.
Solid red for 0.5s and off for 3s alternately	The phone enters the power-saving mode.

Note: The above introduces the default LED status. Your system administrator can configure the status of the power LED indicator.

Camera LED Indicator

The camera LED indicator indicates the phone and camera status.

LED Status	Description
Solid green	The phone is powered on and the camera is properly connected to the phone. The camera is idle. The phone receives an audio-only call.
Flashing green	The phone receives a video call.
Solid red	There is an active video call. The video call is muted. The video call is held.
Slowly-flashing red	The shutter switch is open, but the near-site video is stopped transmitting during a video call. The video call is placed on hold.
Off	The phone is powered off. The camera is not properly connected to the phone. The shutter switch is closed.

Screen and Icons

The user screens and icon indicators can help you navigate and understand the important information on the phone's status.

Control Center and Notification Center

Control center or notification center allows you to access some features or view important notifications quickly.

Procedure

1. Swipe down from the top of the screen.

No.	Name	Description	
1	Time and date	Display the phone's time and date.	
2	Control Center	Video	<ul style="list-style-type: none"> • Tap to access the Camera when the phone is idle. • Tap to stop transmitting video during a video call.
		DND	Tap to turn on/off DND quickly.
		Forward	Tap to enter Call Forward setting screen.
		Auto Answer	Tap to enter Auto Answer setting screen.
		Silent	Tap to turn on/off Silent quickly.
		Wi-Fi	<ul style="list-style-type: none"> • Tap to turn on/off Wi-Fi quickly. • Long tap to enter the Wi-Fi setting screen.
		Bluetooth	• Tap to turn on/off Bluetooth quickly.

No.	Name	Description
		<ul style="list-style-type: none"> • Long tap to enter the Bluetooth setting screen.
	Screenshot	Tap to capture a screenshot.
	USB	Tap to access the File Manager to manage the files in the USB flash drive.
	Settings	Tap to enter the Settings screen.
	Backlight	Drag the slider to adjust the screen brightness quickly.
3	Notification Center	<ul style="list-style-type: none"> • Tap Notification/Missed Calls/Voice Mail/Forwarded to view the corresponding notification list. • Tap the desired notification message to view the details. • Swipe left or right to delete a specific notification. • Tap  to delete all notifications.
4	Android Keys	<ul style="list-style-type: none">  : tap to go back to the previous screen.  : tap to return to the idle screen.  : tap to view and manage the list of recently used applications.

You can swipe up from the bottom of the screen to hide this screen.

Idle Screen

The phone has three idle screens by default. You can swipe left or right to switch among different idle screens.

You can add a new idle screen by moving an application or widget to the right side of the third idle screen. This idle screen will be deleted automatically if there is no application or widget on it.

The Home Screen

On the home screen, you can view the phone's current state, add line keys, and access the dialing, Directory, and History screens.

No.	Name	Description
1	Status Bar	Displays the phone's default account, icons and time.
2	Time	The phone's time is displayed on the right of the status bar.
3	Icons	Icons are displayed in the middle of the status bar.
4	Default account	The label of the default account is displayed on the left of the status bar. If there is no account registered on the IP phones, this field will display No Service .
5	Phone Dialer	Tap to enter the dialing screen.
6	Directory	Tap to enter the Directory screen and view contacts.
7	History	Tap to enter the History screen and view call history.
8	Wallpaper	Shows the specified wallpaper, which can be customized.
9	Android Keys	<ul style="list-style-type: none"> ◁ : tap to go back to the previous screen. ○ : tap to return to the idle screen. □ : tap to view and manage the list of recently used applications.
10	Screen Indicator	Indicates which idle screen is displayed.
11	DSS Key (Dss-key)	Tap to add a line key, and then the line key list will be displayed on the right of the home screen.
12	Digital Clock Widget	Displays the phone's time and date.

The Second Idle Screen

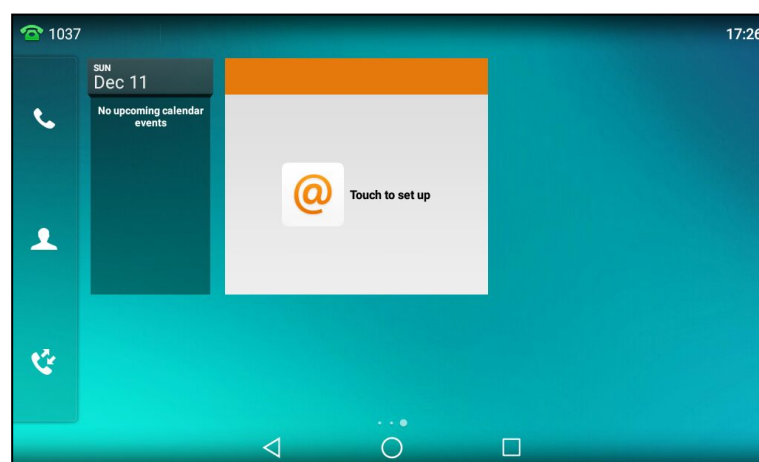

The second idle screen displays phone's system applications by default.

No.	Application	Description
1	Settings	To access phone settings and features.
2	File Manager	To manage files in the internal SD card as well as USB flash drive.
3	Message	To access the video/voice mails or leave video/voice mails for someone.
4	Email	To send and receive emails.
5	Calendar	You can use this application as a reminder or to manage and arrange your events.
6	Camera	To take pictures or record videos.
7	Gallery	To view photos and videos.
8	Recorder	To record audio.
9	Calculator	To quickly calculate numbers
10	Browser	To present and explore content on the World Wide Web.

The Third Idle Screen

The third idle screen displays the calendar and email widgets by default.

No.	Widget	Description
1	Calendar	Displays the data and upcoming events.
2	Email	Displays email list of the specified folder.

Icons in the Status Bar

The icons in the status bar help you easily get the current phone status, such as call and message status.

Icons	Description	Icons	Description
	Wired network is unavailable		Bluetooth mode is on
	Speakerphone (hands-free) mode		Bluetooth headset is both paired and connected
	Handset mode		Bluetooth-enabled mobile phone paired and connected
	Headset mode		Wi-Fi mode is on
	Voice Mail		Wi-Fi signal strength from weak to strong after connecting successfully
	Auto Answer		The USB flash drive is detected
	Do Not Disturb (DND)		Screenshot captured
	Keep Mute		Downloading file
	Silent Mode		Uploading file
	Phone Lock		Upcoming alarm
	Missed Calls		Unread email
	Always Forward		Phone Warning
	No Answer Forward		PSTN box is detected
	Busy Forward		Wireless Access Point

Line Key Icons

By viewing the line key icons, you can easily get the function of the line key.

Icon indicators (associated with line key features)

Icons	Description	Icons	Description
	Hold		DND
	Voice Mail		SMS

	Transfer		Recall
	Record		Recording in process
	Multicast Paging		Hot Desking
	Paging List		Directory
	Phone Lock		DECT Intercom
	Speed Dial		

Icon indicators (associated with line)

Icons	Description	Icons	Description
	The private line registers successfully.		The shared/bridged line registers successfully.
 (Flashing)	Registering.		Register failed.
	DND is enabled on this line.		Call forward is enabled on this line.

Navigating Menus and Fields

You can use different gestures on the touch screen to perform various operations.

Procedure

1. To operate your phone using gestures, follow these tips:

Gesture		Action
Tap		Touch an item on the screen with your finger, and then lift your finger.
Long Tap		Touch an item for about 2 seconds without lifting your finger from the screen till an action occurs.
Swipe		Touch and move. When you want to scroll quickly, swipe your finger across the screen, either up, down, left or right.

Gesture		Action
Drag		Touch and hold, then move. To stop scrolling, stop the dragging motion.
Pinch Open		Touch the screen with two or more fingers, and then move the fingers away from each other (stretch).
Pinch Close		Touch the screen with two or more fingers, and then move the fingers towards each other (pinch).

Entering Information

The phone provides onscreen keyboard, phone keypad and dial pad to enter data. Phone keypad and dial pad provide a standard key layout, which enables you to use existing or familiar key positions.

Topics

[Using the Onscreen Keyboard](#)

[Using the Phone Keypad and Dial Pad](#)

Using the Onscreen Keyboard

The phone supports two kinds of input methods: English (UK) and Google Pinyin for the onscreen keyboard. You can enter information into text fields using the touch screen.

When you use the onscreen keyboard, the following things you need to know:

If you want to	Action
Position the cursor.	Tap to the position.
Select all characters.	<ol style="list-style-type: none"> 1. Long tap the entered character(s). 2. Do one of the following: <ul style="list-style-type: none"> • Tap SELECT ALL on the top of the phone screen. • Drag  to select all characters.
Cut/Copy characters.	<ol style="list-style-type: none"> 1. Long tap the entered character(s). 2. Drag  to select the characters you want to cut/copy. 3. Tap CUT/COPY on the top of the phone screen. 4. Long tap the desired field. 5. Tap PASTE.
Delete more characters at a time.	<ul style="list-style-type: none"> • Long tap the entered character(s). • Drag  to select the characters you want to delete. • Tap . • Long tap .
Replace characters.	<ol style="list-style-type: none"> 1. Drag your finger to highlight the characters you want to replace. 2. Tap the desired character.

Placing a Call from the Dialer

The Dialer enables you to enter a number to place a call, and it displays a list of previously placed calls or contacts in your directory.

You can also select the desired contact from the search list, the placed call list or Directory.

Note: Your system administrator can configure the source list for searching and disable to display the placed call records.

Procedure

1. Do one of the following:
 - Start typing a phone number.
 - Tap the desired line key.
 - Pick up the handset, press the Speakerphone key  or the HEADSET key  .
2. Enter a number.
3. Select **Send**.

Note: Your system administrator can enable live dialpad feature, which enables your phone to automatically dial out the phone number after a period of time without selecting **Send**.

Related Topic

[Switching Among the Handset, Speakerphone and Headset Modes](#)

Placing Multiple Calls

When you are in a call, you can hold your current call and place a new call.

Procedure

1. Do one of the following:
 - Select a line key. The active call is placed on hold.
 - Press the HOLD key  or select **Hold** to place the original call on hold.
Select **New Call**.
2. Enter the desired number or select a contact.
3. Select **Send**.

Placing a Call with a Speed Dial Key

You can quickly dial a number by using a Speed Dial key.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Features > Dsskey**.
3. Select the desired line key.
4. Select **SpeedDial** from the **Type** field.
5. Select the desired line from the **Account ID** field.
6. Do one of the following:
 - (Optional.) Enter the string that will appear on the phone screen in the **Label** field.
Enter the contact number you want to dial out directly in the **Value** field.
You can also enter the contact number with the DTMF sequence that you want to send in the **Value** field. The contact number and DTMF sequence are separated by commas. One comma stands for 500 milliseconds.
For example, **1234,,123#** means the phone dials out the number 1234 first, then after the call is set up for 1 second, it sends the DTMF sequence 123# to the remote party.
 - Select  and select the desired contact.
7. Select .

Tip: By default, you can drag the line key to the **Edit** field to set it.

When the phone is idle, you can tap the Speed Dial key to call a contact quickly. The phone calls a contact using the configured line by default. If you want to call a contact using another line, you can first tap the line key, and then tap the Speed Dial key.

Placing a Call Back to the Last Incoming Number

You can redial the last incoming number quickly by using a Recall key.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Features > Dsskey**.
3. Select the desired line key.
4. Select **Key Event** from the **Type** field.
5. Select **Recall** from the **Key Type** field.
6. (Optional.) Enter the string that will appear on the phone screen in the **Label** field.
7. Select .

Tip: By default, you can drag the line key to the **Edit** field to set it.

When the phone is idle, tap the Recall key to quickly redial the last incoming number.

Redialing a Number

The phone keeps a record of all the placed calls. You can recall the contact you recently called.

Procedure

1. Press the REDIAL key .
The phone screen displays the placed calls list.
2. Tap the desired record.

Tip: Press the REDIAL key  twice to recall the contact you called.

Dialing a Hotline Number

When the phone is off-hook, it will dial out the hotline number automatically after the designated delay time.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Features > Hot Line**.
3. Do one of the following:
 - Enter the desired number in the **Number** field.
 - Select  and select the desired contact.
4. Enter the desired delay time (0-10 seconds) in the **Hotline Delay** field.
5. Select .

Placing an International Call

You can place calls to international phone numbers on your phone.

Procedure

1. Long press digit key 0 on the phone keypad until the **plus sign (+)** appears.
2. Enter the phone number with the country code.
3. Select **Send**.

Placing a Call from the Call History

You can place calls to contacts from the History list, which contains the calls that were recently placed, answered, missed, or forwarded.

Procedure

1. Tap  .
The phone screen displays all call records.
2. Select the desired call list.
3. Tap the desired entry.

Placing a Call from the Directory

You can place a call to a contact directly from your directory.

Procedure

1. Tap  .
2. Select the desired directory.
3. If the contact was added to a specified contact group, you can select the desired contact group.
4. Tap the desired contact.
If the selected contact has multiple numbers, tap the desired number to dial out.

Placing an Anonymous Call

You can hide your name and number when you place a call. As a result, the callee receives an anonymous call without caller identity.

Before You Begin

Contact your system administrator to find out if this feature is available on your phone, and to get the anonymous call on code or off code if required.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Features > Anonymous**.
3. Select the desired line.
4. Turn on **Local Anonymous**.
5. (Optional.) Select **On Code** or **Off Code** from the **Send Anonymous Code** field.
6. (Optional.) Enter the anonymous call on code and off code respectively.
7. Select .
8. Select the anonymous line to place a call.

The callee is prompted with an incoming call from anonymity.

If the callee enables anonymous rejection feature, you may be prompted that the callee does not accept calls from an anonymous number.

Answering a Call When in a Call

You can answer a call when there is already an active call on your phone.

When you are in an active call and an incoming call arrives on the phone, a call waiting tone beeps, and the incoming call information is displayed.

Procedure

1. Select **Answer**.

The active call is placed on hold, and the incoming call becomes active.

Note: You can disable the call waiting feature to reject the incoming call automatically during a call.

Related Topic

[Disabling Call Waiting](#)

Answering a Call Automatically

Auto answer enables you to automatically answer an incoming call in speakerphone (hands-free) mode when your phone is idle.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Features > Auto Answer**.
3. Turn on **Auto Answer** for the desired line.
4. Select .

If the auto answer feature is enabled for the default account, the auto answer icon appears on the phone screen.

Tip: You can also swipe down from the top of the screen to enter the control center, tap **Auto Answer** to enter **Auto Answer** setting screen, and then enable auto answer feature for the desired line.

Disabling Call Waiting

If the call waiting feature is disabled, when there is already a call, the new incoming call will be rejected automatically.

Before You Begin

Check with your system administrator if the call waiting off code is required. If required, get it from your system administrator.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Features > Call Waiting**.
3. Turn off **Call Waiting**.
4. (Optional.) Enter the call waiting off code in the **Off Code** field.
5. Select .

Switching Among the Handset, Speakerphone and Headset Modes

You can select the desired mode before placing a call or can alternate among Speakerphone, headset, and handset modes during a call.

When using the speakerphone or the headset, the LED indicator glows green.

Procedure

1. During the call, pick up the handset, press the Speakerphone key , or press the HEADSET key  ().

For example, if you're using the handset, press the HEADSET key   to switch to the headset, or press the Speakerphone key  to switch to the speakerphone.

Note: Your system administrator can disable you to use the handset, speakerphone (Hands-free) or headset mode.

If there are multiple lines on the phone, you can enable DND for all lines. After activating it, the phone will reject all incoming calls automatically.

Note: If both DND and busy forward are activated on the phone, calls will be forwarded to the configured destination number.

Before You Begin

Check with your system administrator if the DND on code or off code is required. If required, get it from your system administrator.

Procedure

1. Do one of the following:
 - Swipe down from the top of the screen and toggle **DND** on.
 - Swipe left or right to go to the second idle screen, and then navigate to **Settings > Features > DND**. Turn on DND.
2. (Optional.) Enter the DND on code or off code respectively in the **On Code** or **Off Code** field.
3. Tap .

The DND icon appears in the status bar. And the phone prompts you that DND is enabled.

Rejecting Calls with DND on a Specific Line

By default, the DND feature applies to all lines on your phone. Your system administrator can change the DND mode to Custom so that you can enable DND for specific lines.

Before You Begin

The DND mode is set to **Custom**. Check with your system administrator if the DND on code or off code is required. If required, get it from your system administrator.

Procedure

1. Do one of the following:
 - Swipe down from the top of the screen and tap **DND**.
 - Swipe left or right to go to the second idle screen, and then navigate to **Settings > Features > DND**.
2. Select the desired line.
3. Turn on DND.
4. (Optional.) Enter the DND on code or off code respectively in the **On Code** or **Off Code** field.
5. Tap ✓.

The DND icon appears on the desired line.

If you activate DND on the default line, the DND icon will appear both on the line and in the status bar. And the phone prompts you that DND is enabled.

Tip: Before selecting a line, you can tap  > **All On** to activate DND for all lines.

Deactivating DND

You can deactivate DND when you are ready to resume receiving calls again.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Features > DND**.
3. (Optional.) If the DND is activated on a specific line, select the desired line.
4. Turn off DND.
5. Tap ✓.

The DND icon disappears from the status bar.

Tip: To deactivate DND quickly, tap the **Exit DND mode** when the phone is idle. You can also swipe down from the top of the screen to enter the control center and then tap **DND** to deactivate DND.

You can tap  > **All Off** at the top right to deactivate DND for all lines.

Ending Calls

You can end the current call at any time.

Procedure

1. Do one of the following:
 - If you are using the handset, select **End Call** or hang up the handset.
 - If you are using the headset, select **End Call**.
 - If you are using the speakerphone, press the Speakerphone key  or select **End Call**.

Redialing a Call Automatically

You can set the phone to redial a phone number automatically when you call a contact and the contact's line is unavailable.

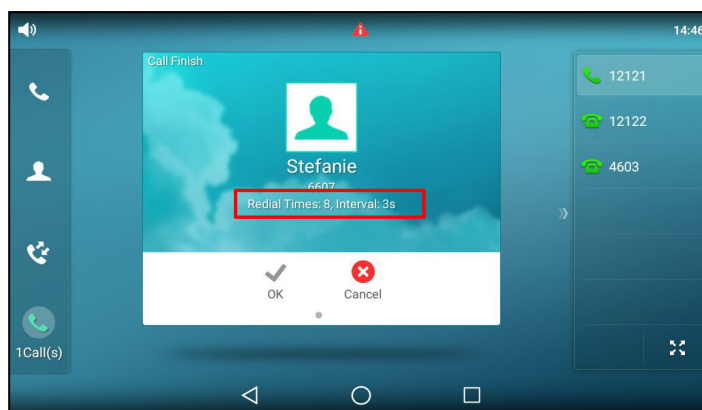

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Features > Auto Redial**.
3. Turn on **Auto Redial**.
4. Enter the desired time (between 1 and 300 seconds) in the **Redial Interval** field.
5. Enter the desired times (between 1 and 300) in the **Redial Times** field.
6. Select .

When you dial a number but fail to establish a call, the phone prompts the failure reason and then prompts whether to auto redial the contact, select **OK** to activate auto redial.

The phone screen displays the redial times and interval. The phone will retry as many times as configured until the callee answers the call.

Muting/Unmuting Audio

When you are in a call, you can mute the audio, so that you can hear the other person, but they cannot hear you.

Procedure

1. Press the MUTE key   during a call.
The mute key LED glows red.
2. Press the MUTE key   again to unmute the call.
The mute key LED goes out.

Keep Mute

In a meeting room, if incoming calls are answered automatically on your phone, callers may hear your discussion with your colleagues. You can keep the phone in mute to prevent this unintended situation.

The mute state of your phone persists across calls. The phone stays in the mute state until you unmute the microphone manually or until the phone restarts.

Before You Begin

Check with your system administrator if keep mute is configured on your phone.

Procedure

1. Press the MUTE key   when the phone is idle.
The mute key LED glows red, and the mute icon appears on the idle screen.

2. Press the MUTE key  () again to deactivate the mute state.

Holding and Resuming Calls

You can place an active call on hold and resume the call when you are ready. When you place a call on hold, the held party may hear the music played by its sever.

Topics

[Holding a Call](#)

[Resuming a Held Call](#)

Holding a Call

You can place an active call on hold on your phone.

Procedure

1. Press the HOLD key  or select **Hold** during a call.

Note: When you have multiple calls on the phone and the current call is held, you can tap the call directly to swap to the active call.

Resuming a Held Call

You can view and resume a held call on the phone.

Procedure

1. Press the HOLD key  or select **Resume**.

If multiple calls are placed on hold, select the desired call first.

Note: When you have multiple calls on the phone and the current call is active, you can tap the call directly to swap to the held call.

Redirecting Incoming Calls

When you are not available to answer calls on your phone, you can forward the calls to another phone.

Topics

- [Forwarding All Incoming Calls to a Contact](#)
- [Forwarding an Incoming Call Manually](#)
- [Forwarding Incoming Calls with a Forward Key](#)
- [Diverting Calls to a Contact](#)

Forwarding All Incoming Calls to a Contact

You can set up the forwarding type which enables your phone to forward all incoming calls to a contact.

There are three types of forwarding:

- **Always Forward:** Forwards all incoming calls immediately.
- **Busy Forward:** Forwards incoming calls when you are busy in a call.
- **No Answer Forward:** Forwards incoming calls when no one answers the calls.

Topics

- [Forwarding All Incoming Calls on All Lines](#)
- [Forwarding All Incoming Calls on a Specific Line](#)
- [Deactivating Call Forward](#)

Forwarding All Incoming Calls on All Lines

You can forward all incoming calls on the phone.

Before You Begin

Check with your system administrator if the forward on code or off code is required. If required, get it from your system administrator.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Features > Call Forward**.
3. Select the desired forwarding type and tap **On** from the corresponding field.
4. Do one of the following:
 - Enter the contact number you want to forward incoming calls to in the **Forward to** field.
 - Select  and select the desired contact.
5. If you select the **No Answer Forward** option, select the desired ring time to wait before forwarding from the **After Ring Time** field.
6. (Optional.) Enter the always/busy/no answer forward on code or off code respectively in the **On Code** or **Off Code** field.
7. Tap .

The call forward icon appears in the status bar. And the phone prompts you that call forward is enabled.

Tip: You can also swipe down from the top of the screen to enter the control center, tap **Forward** to enter the desired Call Forward setting screen according to the current forward type.

If you have not configured the call forward type, tapping **Forward** will turn to the Always Forward setting screen.

Forwarding All Incoming Calls on a Specific Line

By default, the forwarding setting applies to all lines on your phone. Your system administrator can change the forward mode to Custom so that you can forward all incoming calls for specific lines.

Before You Begin

Check with your system administrator if the forward on code or off code is required. If required, get the forward on code or off code from your system administrator.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Features > Call Forward**.
3. Select the desired line.
4. Select the desired forwarding type and tap **On** from the corresponding field.
5. Do one of the following:
 - Enter the contact number you want to forward incoming calls to in the **Forward to** field.
 - Select  and select the desired contact.
6. If you select the **No Answer Forward** option, select the desired ring time to wait before forwarding from the **After Ring Time** field.
7. (Optional.) Enter the always/busy/no answer forward on code or off code respectively in the **On Code** or **Off Code** field.
8. Tap .

The forward icon appears on the desired line.

If you activate forward on the default line, the forward icon will appear both on the line and in the status bar. And the phone prompts you that call forward is enabled.

Tip: You can tap  > **All Lines** to activate forward for all lines.

Deactivating Call Forward

You can deactivate the call forward when you no longer want to forward your calls.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Features > Call Forward**.
3. (Optional.) If the forward is activated for a specific line, select the desired line.
4. Select the desired forwarding type and tap **Off** from the corresponding field.
5. Tap .

Tip: You can tap  > **All Lines** to deactivate forward for all lines. You can also tap **Close forward**. to deactivate forward for all lines.

Forwarding an Incoming Call Manually

You can manually forward the call to another contact while your phone rings.

Procedure

1. When the phone is ringing, select **Forward**.
2. Enter the number you want to forward the incoming call to.

3. Select **Forward**.

The phone prompts a call forward message.

Forwarding Incoming Calls with a Forward Key

When the phone receives an incoming call, you can easily tap the Forward key to forward the incoming call to a specific contact.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Features > Dsskey**.
3. Select the desired line key.
4. Select **Key Event** from the **Type** field.
5. Select **Forward** from the **Key Type** field.
6. If your system administrator has set the forward mode to **Custom**, select the desired line.
7. Do one of the following:
 - (Optional.) Enter the string that will display on the phone screen in the **Label** field.
Enter the contact number you want to forward the incoming calls to in the **Value** field.
 - Select  and select the desired contact.
8. Select .

Tip: By default, you can drag the line key to the **Edit** field to set it.

When the phone is ringing, tap the forward key to quickly forward the call to the specific contact.

Diverting Calls to a Contact

You can divert all incoming calls from a particular contact to another contact. Auto divert has precedence over call forward.

Procedure

1. Select .
2. Tap  after the desired contact.
3. Edit the contact information.
4. Enter a contact's number you want to divert the call to in the **Auto Divert** field.
5. Select .

Transferring Calls

During a call, you can transfer the call to another contact.

You can use one of three ways:

- **Blind Transfer:** Transfer a call directly to the third party without consulting.
- **Semi-Attended Transfer:** Transfer a call when receiving ringback.
- **Attended Transfer (Consultative Transfer):** Transfer a call with prior consulting.

Topics

[Performing a Blind Transfer](#)

[Performing a Semi-Attended/Attended Transfer](#)

Performing a Blind Transfer

You can transfer a call to another contact immediately without consulting with her/him first.

Topics

[Performing a Blind Transfer Normally](#)

[Performing a Blind Transfer Conveniently](#)

Performing a Blind Transfer Normally

You can enter the number, or select a contact from directory or history to perform a blind transfer.

Procedure

1. Press the TRANSFER key  or select **Transfer** during a call.
2. Do one of the following:
 - Enter the number you want to transfer the call to, and press the TRANSFER key  or select **Transfer**.

The phone will prompt a dialog box as the following shows:

Select **Transfer** to complete the transfer. (The call will automatically dial out in about 5 seconds if you do not select **Transfer**.)

- Select , and select the desired contact to complete the transfer.
- Select , and select the desired list. Select the desired entry to complete the transfer.

Performing a Blind Transfer Conveniently

You can perform a blind transfer conveniently by dragging the far-site window to a target speed dial or BLF key, or to another one.

Procedure

You can do one of the following:

- When there is an active call for the account which is related with the speed dial or BLF key. Drag the far-site window to that speed dial or BLF key.

Then the call is connected to the number specified in the **Value** field of the speed dial or BLF key.

- When there is an active call and one or more calls on hold, drag the active far-site window to another held one.

And then tap **Transfer** from the screen.

The active call is connected to the number of the held party.

Performing a Semi-Attended/Attended Transfer

You can transfer calls to other contacts immediately when receiving ringback or after consulting with them first.

Procedure

1. Press the TRANSFER key  or select **Transfer** during a call.
2. Do one of the following:
 - Enter the number you want to transfer the call to.
Select **Transfer** > **Send** to dial out.
 - Select , and select the desired contact to dial out.
 - Select , and select the desired entry to dial out.

3. Do one of the following:

- When you hear the ringback tone, press the TRANSFER key  or select **Transfer** to finish the semi-attended transfer.
- After the contact answers the call, press the TRANSFER key  or select **Transfer** to finish the attended transfer (consultative transfer).

Tip: If you are using a handset, the transfer can be completed by hanging up the handset.

Performing Transfer with a Transfer Key

By default, you can transfer a call to a specific contact directly using a Transfer key during a call.

Your system administrator can also set your phone to perform attended transfer when using a Transfer key.

Setting a Transfer Key

You can set a line key as a Transfer key, and specify a contact you want to transfer a call to for this key.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Features > Dsskey**.
3. Select the desired line key.
4. Select **Key Event** from the **Type** field.
5. Select **Transfer** from the **Key Type** field.
6. Do one of the following:
 - (Optional.) Enter the string that will appear on the phone screen in the **Label** field.
Enter the contact number you want to transfer the call to in the **Value** field.
 - Select  and select the desired contact.
7. Select .

Tip: By default, you can drag the line key to the **Edit** field to set it.

Performing a Blind Transfer Using a Transfer Key

After you have set a Transfer key with a specific contact, you can perform a blind transfer by using it.

Before You Begin

Confirm with your system administrator that the transfer mode has set to perform a blind transfer.

Procedure

1. Tap the Transfer key during a call.
The call is transferred to the specific contact directly.

Related Topic

[Setting a Transfer Key](#)

Performing a Semi-attended/Attended Using a Transfer Key

After you have set a Transfer key with a specific contact, you can perform a semi-attended/attended transfer by using it.

Before You Begin

Confirm with your system administrator that the transfer mode has set to perform attended transfer.

Procedure

1. Tap the Transfer key during a call.

The phone calls the specific contact first. Wait until you hear the ringback tone or until the contact answers the call.

2. Tap the Transfer key again.

Setting Up a Local Conference Call

Procedure

1. Place a call to the first party.
2. Select **Conference** to place a new call.
The active call is placed on hold.
3. Dial the second party's number.
4. When the second party answers the call, select **Conference** to add the second party to the conference.
5. Repeat the above steps to add more parties to the conference.

Merging Two Calls into a Conference

You can invite a held call into a conference call with the active call.

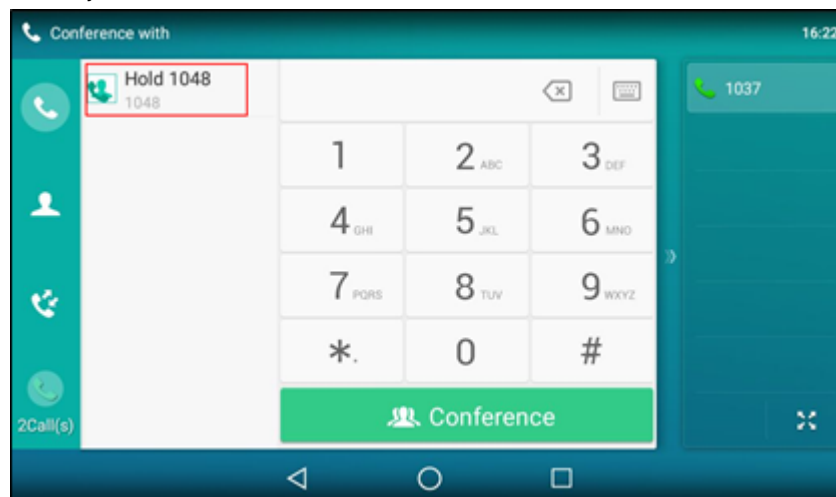

Procedure

1. Place two calls on the phone.
2. Do one of the following:
 - Drag one far-site window to another far-site window.

And then tap **Conference** from the pop-up box.

- Tap the desired call for a conference and ensure that the call is active. Tap **Conference**. Tap the Hold call to join the calls in the conference.

Creating a Hybrid Conference

You can merge the calls on your phone, and connected mobile phone into a hybrid conference.

There are many ways to create a hybrid conference, the following shows an example.

Before You Begin

Make sure you have connected a mobile phone to your phone.

Procedure

1. Place a mobile call over Bluetooth on the mobile phone.
2. Place a call on the phone.
3. Tap **Conference**.
4. Tap the hold call.

The calls are merged into a conference call.

Setting a Conference Key

You can set a conference key to create a multi-party conference.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Features > Dsskey**.
3. Select the desired line key.
4. Select **Key Event** from the **Type** field.
5. Select **Conference** from the **Key Type** field.
6. (Optional.) Enter the string that will appear on the phone screen in the **Label** field.
7. Select .

Initiating a Multi-party Conference

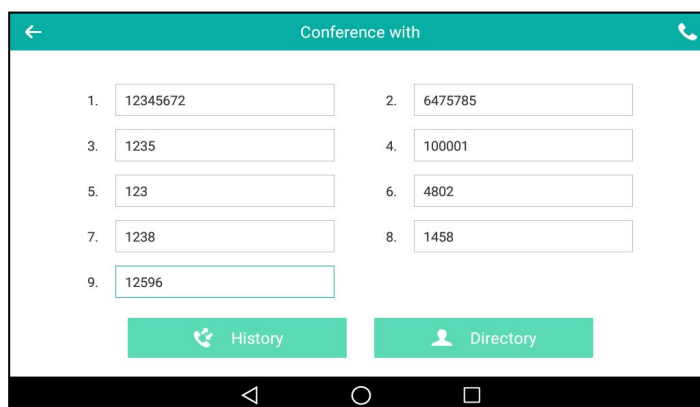

You can call all contact numbers at a time to initiate a multi-party conference.

Before You Begin

You have set a conference key on the phone.

Procedure

1. Select the conference key on the idle screen.
2. Do one of the following:
 - Enter all contact numbers you want to add to the conference.
 - Select **History** or **Directory** to select the desired contact.

The screenshot shows a mobile phone interface titled "Conference with". It features a list of 9 contact numbers in input fields, arranged in two columns. The numbers are: 1. 12345672, 2. 6475785, 3. 1235, 4. 100001, 5. 123, 6. 4802, 7. 1238, 8. 1458, 9. 12596. At the bottom, there are two buttons: "History" and "Directory".

3. Select .

Related Topic

[Setting a Conference Key](#)

Holding or Resuming a Conference Call

When you place a conference call on hold, other participants cannot hear each other until you resume the held conference call.

Procedure

1. Press the HOLD key  or tap **Hold** to place the conference on hold.
2. Press the HOLD key  again or tap **Resume** to resume the held conference call.

Muting or Unmuting a Conference Call

When you mute the local microphone during a conference call, other participants can hear each other except you.

Procedure

1. Press the MUTE key  to mute the conference.
2. Press the MUTE key  again to unmute the conference.

Splitting a Conference Call

You can split the conference call into individual calls. After the split, the conference call ends, and other parties are held.

Procedure

1. Select **Split**.

Managing Conference Participants

You can manage the conference participants to make the conference more flexible.

Procedure

1. Long tap the desired party, you can do the following:
 - Select **Far Mute** to mute the party. The muted party can hear everyone, but no one can hear the muted party.
 - Select **Far Hold** to hold the party. The held party cannot hear anyone, and no one can hear the held party.
 - Select **Remove** to remove the party from the conference call.

Ending a Conference Call

When you end the conference call, the other parties drop the call.

However, the system administrator can set up your phone so that the other two parties remain connected when you end the conference call.

Procedure

1. Select **End Call**.

Network Conference

If your system administrator has set a network conference feature on your phone, you can initiate a conference with two or more contacts.

Topic

[Setting Up a Network Conference](#)

Setting Up a Network Conference

You can set up a network conference with multiple parties.

Procedure

1. Place a call to the first party.
2. Select **Conference** to place a new call.
The active call is placed on hold.
3. Enter the number of the second party, and then select **Conference**.
4. When the second party answers the call, select **Conference** to add the second party to the conference.
5. Select **Conference** to place a new call.
The conference call is placed on hold.
6. Enter the number of the new party, and then select **Conference**.
7. When the new party answers the call, select **Conference** to add the new party to the conference.
8. Repeat steps 5 to 7 until you add all parties.

The conference is set up after the intended parties answer the call.

Note: The Procedures for setting up a network conference call on specific servers may be different from the introduction above. Contact your system administrator for more information.

Call Recording

You can record up to 12 hours in one file. By default, the recorded files are saved in the internal SD card.

But if there is a USB flash drive connected to the rear USB port of your phone, the recorded files will be saved in the storage device according to the priority: USB flash drive>internal SD card.

Topics

- [Recording a Call](#)
- [Recording a Conference](#)
- [Setting a Mark When Recording a Call](#)
- [Stopping a Recording](#)
- [Checking Storage Space](#)

Recording a Call

You can record the important parts during an active call.

Important: Before call recording, especially those involving PSTN, it is necessary to know about the rules and restrictions of call recording in the country where you are. It is also very important to inform all the call parties that you are recording and ask for their consent before recording the conversation.

Procedure

1. During a call, swipe the soft key area left and then select **Record**.
The phone screen displays a recording icon and recording duration.

Recording a Conference

You can record conference calls in the same way as other calls. All conference participants are recorded while recording.

The following lists exceptions:

- If one of the participants holds the conference call, only that participant is recorded. When a conference call is placed on hold, recording of the conference is paused. You can place or answer other calls, which will be recorded in the same file. When the conference call is resumed, recording of the conference resumes.
- If one of the participants mutes the conference call, only that participant is not recorded.

Related Topics

[Recording a Call](#)

Setting a Mark When Recording a Call

You can set a mark when recording a call to mark the special moment. And there will be a red flag on this moment when playing the recorded file so that you can drag to the moment quickly.

Procedure

1. Select .

The icon changes to , the number will increase if you set more marks.

Stopping a Recording

You can stop recording a call before the call ends. The recording also stops when the active call ends. The recording will be saved as a "*.aac" file in the internal SD card or the USB flash drive automatically.

Procedure

1. Do one of the following:
 - Swipe the soft key area left and then select **Stop** during a call.
The recording icon and recording duration disappears. The screen prompts a message that the call is recorded successfully.
 - Select **End Call**.
The recording icon and recording duration disappears, and the phone returns to the idle screen. The screen prompts a message that the call is recorded successfully.

Checking Storage Space

You can check the total space or available space of the phone or connected USB flash drive.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Status > Storage**.

Multicast Paging

Multicast Paging allows you to broadcast instant audio announcements to users who are listening to a specific multicast group on a specific channel.

The phone supports the following 31 channels:

- **0**: Broadcasts are sent to channel 0. Note that the Yealink IP phones running old firmware version (old paging mechanism) can be regarded as listening to channel 0. It is the default channel.
- **1 to 25**: Broadcasts are sent to channel 1 to 25. We recommend that you specify these channels when broadcasting with Polycom IP phones which have 25 channels you can listen to.
- **26 to 30**: Broadcasts are sent to channel 26 to 30. We recommend that you specify these channels when broadcasting with Yealink IP phones running new firmware version (new paging mechanism).

Note: All IP phones in the multicast paging group must be deployed in the same subnet since a broadcast is used. The phone can only send/receive broadcasts to/from the listened channels. Other channels' broadcasts will be ignored automatically by the IP phone.

Topics

[Deleting a Paging Group](#)

Setting a Multicast Paging Key

You can set a Multicast Paging key for a paging group, which allows you to send announcements quickly on the idle screen.

Before You Begin

Get the multicast IP address and port number from your system administrator.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Features > Dsskey**.

3. Select the desired line key.
4. Select **Key Event** from the **Type** field.
5. Select **Multicast Paging** from the **Key Type** field.
6. (Optional.) Enter the paging group name in the **Label** field.
7. Enter the multicast IP address and port number (for example, 224.5.6.20:10008) in the **Value** field.
8. Enter the desired channel between 0 and 30 in the **Channel** field.
9. Select .

Tip: By default, you can drag the line key to the **Edit** field to set it.

Sending a Paging by a Multicast Paging Key

You can send a paging by using the Multicast Paging key when the phone is idle.

Before You Begin

You need to set a Multicast Paging key in advance.

Procedure

1. Tap the Multicast Paging key when the phone is idle.

Both your phone and receiver's phone play a warning tone and the multicast RTP session will be automatically answered on the receiver's phone in the speakerphone (hands-free) mode.

The multicast paging key icon will become  and solid.

The following figure shows a multicast RTP session on the phone:

Setting a Paging List Key

You can set a Paging List key to easily access the paging groups on the idle screen.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Features > Dsskey**.
3. Select the desired line key.
4. Select **Key Event** from the **Type** field.
5. Select **Paging List** from the **Key Type** field.

6. (Optional.) Enter the string that will display on the phone screen in the **Label** field.
7. Select .

Tip: By default, you can drag the line key to the **Edit** field to set it.

Setting a Paging Group

You can edit the information of the paging group.

Before You Begin

A Paging List key is set in advance. Get the multicast IP address and port number from your system administrator.

Procedure

1. Tap the Paging List key when the phone is idle.
2. Select  after the desired paging group.
The default tag is Empty if it is not configured before.
3. Enter the multicast IP address and port number (for example, 224.5.6.20:10008) in the **Address** field.
4. Enter the string that will display on the phone screen in the **Label** field.
5. Enter the desired channel between 0 and 30 in the **Channel** field.
6. Select .
7. To set more paging groups, repeat steps 2 to 6.

Sending Pages by a Paging List Key

You can send a paging by using the Paging List key when the phone is idle.

Before You Begin

You need to set a Paging List key in advance.

Procedure

1. Tap the Paging List key when the phone is idle.
2. Select the desired paging group.
Both your phone and receiver's phone play a warning tone and the multicast RTP session will be automatically answered on the receiver's phone in the speakerphone (hands-free) mode.

Deleting a Paging Group

You can delete any group from the paging group list.

Procedure

1. Tap the Paging List key when the phone is idle.
If the Paging List key is not configured, you can also swipe left or right to go to the second idle screen. And then navigate to **Settings > Features > Paging List** to configure the paging list.
2. Select  after the desired paging group.
3. Select **Delete**.
The phone prompts you to delete the paging group or not.
4. Select **OK**.

If you want to delete all paging groups, you can tap  on the top-right of the phone screen.

Receiving Multicast Paging

Your system administrator has set a listening paging group for you, you can automatically receive a paging call when the phone is idle.

When there is a voice call or a paging call in progress, the phone handles the new paging call differently according to the multicast listening settings configured by your system administrator.

Managing a Paging Call

During a paging call, you can manage it manually at any time.

Procedure

- Select **Hold** to place the current paging call on hold.
The paging call is placed on hold and the receiver releases the session.
- Select **Resume** to resume the held paging call.
The multicast RTP session is re-established.
- Select **Record** to record a call.
- Select **End Call** to end the paging call.

Sharing Content during a Call

During the call, you can share content with the far site from the computer, that is installed the Yealink VC Desktop application.

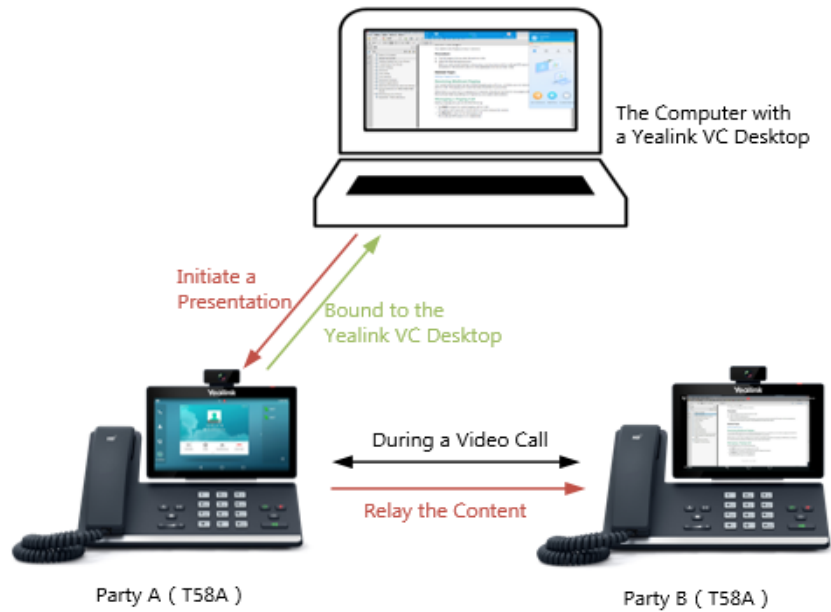

Note: If you change the call status, for example, hold a call or perform a call transfer, the content sharing automatically stops. During the conference call, you cannot share content with other parties. The matching Yealink VC Desktop application version is 1.28.0.1.

Before You Begin

Make sure that INFO signaling traversal or upgrading the audio call to the video call is supported by your server.

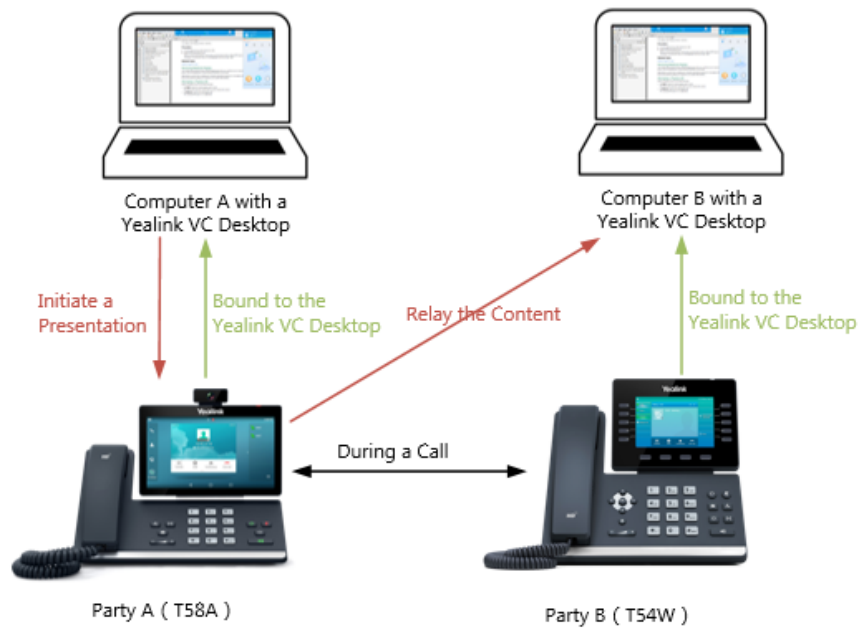

Scene 1-Far site supports video

During the video call, party A shares content from the computer using Yealink VC Desktop with party B. Party A and party B temporarily exit the video call, and phone A prompts that it is sharing contents, and the far-site window of phone B displays the shared content from party A. After the sharing, party A can continue the video call with the party B.

Scene 2-Far site does not support video

During the call, party A shares content from the computer A using Yealink VC Desktop with party B. Phone A prompts that it is sharing content, and the Yealink VC Desktop on computer B displays the shared content from party A.

Procedure

1. Bind your phone to the Yealink VC Desktop.
2. Share content with another phone using Yealink VC Desktop.

For more information, see [Yealink VC Desktop User Guide](#).

Advanced Call Features

You can perform some server-dependent tasks on the phone. Contact your system administrator to find out if your phone supports these advanced call features.

[Automatic Call Distribution \(ACD\)](#)

Using Call Completion

When you call someone who is temporarily unavailable to answer the call, you can monitor the busy party and establish a call after the busy party becomes available to receive a call.

Note: Call completion is not available on all servers. For more information, contact your system administrator.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Features > Call Completion**.
2. Turn on **Call Completion**.
3. Select .

When you place a call and the callee is temporarily unavailable to answer the call, the phone prompts whether to wait for the callee, select **OK** to activate the call completion feature.

When the callee becomes idle, the phone prompts whether to dial the number, select **OK** to dial the number.

Call Pickup

You can use call pickup to answer someone else's incoming call on your phone.

The phone supports the following two call pickup features:

- **Directed Call Pickup:** allows you to pick up incoming calls to another phone.
- **Group Call Pickup:** allows you to pick up incoming calls to any phone within a predefined group.

Check with your system administrator to find out if this feature is available on your phone.

Topics

[Picking up a Call with a Group Pickup Key](#)

Picking up a Call Directly

You can answer a call that rings on another phone.

Before You Begin

The target phone receives an incoming call. Your system administrator has enabled the directed call pickup and set the directed call pickup code.

Procedure

1. Pick up the handset, press the Speakerphone key  or tap the line key.

The DPickup appears on the phone screen.

2. Select **DPickup** on your phone.
3. Enter the phone number which is receiving an incoming call.
4. Select **DPickup** again.

The call is answered on your phone.

Tip: When the phone is idle, you can use a Directed Pickup or BLF/BLF List key to pick up a call to a specific contact directly.

Picking up a Group Call Directly

When any phone within a predefined group receives an incoming call, you can pick up that call on your phone.

If there are multiple incoming calls on the group at the same time, you can only pick up the first incoming call.

Before You Begin

Your system administrator has enabled the group call pickup and set the group call pickup code.

Procedure

1. Pick up the handset, press the Speakerphone key  or tap the line key.

*The **GPickup** appears on the phone screen.*

2. Select **GPickup** on your phone when any phone in the group receives an incoming call.

The call is answered on your phone.

Tip: When the phone is idle, you can use a Group Pickup key to pick up a group call directly.

Related Topic

[Picking up a Call with a Group Pickup Key](#)

Picking up a Call with a Pick Up Key

You can easily use a Pick Up key to pick up a call to a specific contact's phone.

Before You Begin

Ask your system administrator for the directed call pickup code.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Features > Dsskey**.
3. Select the desired line key.
4. Select **Key Event** from the **Type** field.
5. Select **DPickup** from the **Key Type** field.
6. Select the desired line from the **Account ID** field.
7. Do one of the following:
 - (Optional.) Enter the string that will display on the phone screen in the **Label** field.
Enter the directed call pickup code followed by the specific extension in the **Value** field.
 - Select  and select the desired contact.
8. Select .

Tip: By default, you can drag the line key to the **Edit** field to set it.

When the target phone receives an incoming call, you can press the Pick Up key, and the call is answered on your phone.

Picking up a Call with a Group Pickup Key

You can easily select a Group Pickup key to pick up a group call.

Before You Begin

Check with your system administrator if the group call pickup code is required for this key. If required, get the group call pickup code from your system administrator.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Features > Dsskey**.
3. Select the desired line key.
4. Select **Key Event** from the **Type** field.
5. Select **Group Pick Up** from the **Key Type** field.
6. Select the desired line from the **Account ID** field.
7. Do one of the following:
 - (Optional.) Enter the string that will appear on the phone screen in the **Label** field.
Enter group call pickup code in the **Value** field.
 - Select  and select the desired contact.
8. Select .

Tip: By default, you can drag the line key to the **Edit** field to set it.

When any phone within a predefined group of phones receives an incoming call, you can tap the Group Pickup key, and the call is answered on your phone.

Call Park and Call Retrieve

You can park a call, and then retrieve the call either from your phone or another phone. After parked, the call is placed on hold, you can continue the conversation after retrieving it.

Note: Call park is not available on all servers. Check with your system administrator to find out if it is available on your phone.

Parking or Retrieving a Call in the FAC Mode

You can park the call to the local extension or the desired extension through dialing the park code.

Topics

- [Parking a Call in the FAC Mode](#)
- [Retrieving a Parked Call in the FAC Mode](#)

Parking a Call in the FAC Mode

You can park a call in the FAC mode directly. When you park a call to the local extension or the desired extension, the call is held in the same network on your phone.

Before You Begin

Your system administrator has set call park in the FAC mode.

Procedure

1. During a call, swipe the soft key area left and select **Park**.
The phone will dial the call park code which is pre-configured.

2. Do one of the following:

- If you want to park the call against the local extension, press the # key.
- If you want to park the call against the desired extension, enter the extension (for example, 4606) where you want to park the call and press the # key.

If the call is parked successfully, you will hear a voice prompt that the call is parked.

Tip: You can use a Park key or a BLF key to park a call to a specific contact directly.

Related Topics

Retrieving a Parked Call in the FAC Mode

You can retrieve a parked call in the FAC mode from any phone within your network.

Before You Begin

Your system administrator has set call park in the FAC mode. There is a call parked on the extension.

Procedure

1. Pick up the handset, press the Speakerphone key  or tap the line key.
2. Select **Retrieve Park** on the dialing screen.
The phone will dial the park retrieve code which is configured in advance.
3. Follow the voice prompt to retrieve:
 - Press the # key on the phone where the call is parked.
 - Enter the desired extension followed by # (for example, 4606#) on any phone.

Tip: When the phone is idle, you can use a Retrieve key, BLF key or BLF List key to retrieve a parked call directly.

State Indicator of the Park/Retrieve key

You can get the call park/retrieve status by viewing the icon indicator of the Park/Retrieve key.

Icons	Description	Icons	Description
	Park successfully/Idle state.		Park failed.
	Ringing state.		Retrieve parked call.

Parking a Call using a Park Key

You can set a line key as a Park key, and specify an extension or a shared parking lot you want to park a call to for this key. By using the Park key you can park a call quickly.

Before You Begin

Check with your system administrator if the FAC or Transfer mode is set on your phone, and if **Account ID** it is necessary for this key.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Features > Dsskey**.

3. Select the desired line key.
4. Select **Key Event** from the **Type** field.
5. Select **Call Park** from the **Key Type** field.
6. (Optional.) Select the desired line from the **Account ID** field.
7. Do one of the following:
 - (Optional.) Enter the string that will appear on the phone screen in the **Label** field.
Enter the park extension number or the shared parking lot you want to park the call to in the **Value** field.
 - Select  and select the desired contact.
8. Select .

Tip: By default, you can drag the line key to the **Edit** field to set it.

During a call, you can tap the Call Park key, and the call is parked to the desired extension or the shared parking lot directly.

Retrieving a Parked Call using a Retrieve Key

You can set a line key as a Retrieve key, and specify a parked extension or retrieve lot you want to retrieve a parked call from for this key. By using the Retrieve key you can retrieve a parked call quickly.

Before You Begin

Check with your system administrator if the FAC or Transfer mode is set on your phone, and if **Account ID** is necessary for this key.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Features > Dsskey**.
3. Select the desired line key.
4. Select **Retrieve** from the **Type** field.
5. (Optional.) Select the desired line from the **Account ID** field.
6. Do one of the following:
 - (Optional.) Enter the string that will appear on the phone screen in the **Label** field.
Enter the parked extension or the retrieve lot in the **Value** field.
 - Select  and select the desired contact.
7. Tap .

Tip: By default, you can drag the line key to the **Edit** field to set it.

When there is a call parked on the extension or the shared parking lot, you can tap the Retrieve key on the idle screen, and the call is retrieved from the parked extension or shared parking lot directly.

You can get the monitored line's status by viewing the icon indicator of the BLF key.

Icons	Description	Icons	Description
	The monitored line is idle	 (Flashing)	The monitored line is ringing.
 (Flashing)	The monitored line is dialing		The monitored line is busy or in a call.
	The monitored line places a call on hold		A call is parked to the monitored line.
	The monitored line fails to register or does not exist.		

Audio Alert for BLF Pickup

The Audio Alert for BLF Pickup feature allows your phone to play a tone when the specified monitored line receives an incoming call.

Setting an Alert Tone for Monitored Lines

You can set the alert ring type for the monitored lines to make it easier to recognize.

Before You Begin

Check with your system administrator to find out if the Audio Alert for BLF Pickup feature is available.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Basic Settings > Sound > BLF Ring Tones**.
3. Select the desired ring tone.
4. Select  .

Visual Alert for BLF Pickup

Your system administrator can configure your phone to display the call information when the specified monitored line receives an incoming call.

You can select to pick up the call to the monitored line, place a call to the monitored line, place a new call or go back to the idle screen.

Setting a BLF Key

You can set a BLF key to monitor a specific line for status changes on the phone.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Features > Dsskey**.
3. Select the desired line key.
4. Select **BLF** from the **Type** field.
5. Select the desired line from the **Account ID** field.
6. Do one of the following:
 - (Optional.) Enter the string that will appear on the phone screen in the **Label** field.
Enter the phone number or the extension you want to monitor in the **Value** field.
 - Select  and select the desired contact.
7. (Optional.) Enter the directed call pickup code in the **Extension** field.
8. Select .

Tip: By default, you can drag the line key to the **Edit** field to set it.

Picking up a Remote Call by BLF Key

When the monitored users are not at their desks and someone rings their lines, you can pick up the desired call simply by tapping the flashing BLF key.

If your system administrator sets the directed call pickup code in advance, you can use the BLF key to pick up the call directly. If not or if you want to set a pickup code for a specific BLF line, you can set a pickup code for the BLF key manually.

Before You Begin

You have edited the BLF key's **Extension** field with the directed call pickup code from your system administrator.

Procedure

1. When the monitored line receives an incoming call, you can tap the BLF key to pick up the call for the monitored line directly.

Related Topic

[Performing a Semi-attended/Attended Transfer](#)

Performing a Blind Transfer

During a call, you can use the BLF List key to perform a blind transfer to the monitored line.

Before You Begin

Check with your system administrator to make sure that the Transfer Mode via Dsskey is set to **Blind Transfer**.

Procedure

1. During a call, tap the BLF List key of the monitored line which you want to transfer this call to.

Performing a Semi-attended/Attended Transfer

During a call, you can use the BLF List key to perform a semi-attended/attended transfer to the monitored line.

Before You Begin

Check with your system administrator if the Transfer Mode via Dsskey is set to **Attended Transfer**.

Procedure

1. During a call, tap the BLF List key of the monitored line which you want to transfer this call to.

The phone will dial out the number of the monitored line.

2. Tap the BLF List key of the monitored user again or **Transfer** to complete the transfer when the monitored user receives ringback or after the monitored user answers the call.

Parking a Call by a BLF List Key

You can use the BLF List key to park a call to the monitored user who is idle.

Before You Begin

Check with your system administrator to find out if this feature is available on your phone.

Procedure

1. During a call, press the desired BLF List key.

Retrieving a Call by a BLF List Key

You can use the BLF List key to retrieve a call that is parked to the monitored line.

Before You Begin

Check with your system administrator to find out if this feature is available on your phone.

Procedure

1. Tap the desired BLF List key to retrieve a call that is parked to the monitored line.

Barging in an Active Call by BLF List Key

You can use the BLF List key to barge in a conversation and set up a conference call.

Before You Begin

Check with your system administrator to find out if this feature is available on your phone.

Procedure

1. Tap the BLF List key.

The phone dials out the barge-in code followed by the monitored line, and then you can join the call. Each of the three parties can hear the other two parties.

Retrieving a Call Parked to the Monitored Line

When a call is parked to the monitored line, you can retrieve the parked call on the phone.

Before You Begin

Check with your system administrator to find out if Visual Alert for BLF Parked Call Monitor is enabled on your phone.

Procedure

1. Select **Retrieve**.

Shared Line

Yealink phone supports using Shared Call Appearance (SCA) to share a line. So that this line can be registered on more than one phone at the same time.

Your system administrator can set your phone to use the shared line.

Topics

[Barging in an Active Call on a Shared Line](#)

[Pulling a Shared Call on a Shared Line](#)

State Indicator of Shared Line

You can get the shared line's status by viewing the icon indicator of the shared line key.

The following table shows all kinds of icon indicator associated with the shared line and the corresponding descriptions:

Icons	Description	Icons	Description
	The shared line is idle.	 (Monitoring SCA Phone)	The shared line is seized.
 (Flashing)	The shared line receives an incoming call.	 (Flashing)	The shared line is dialing.
	The shared line is busy or is in a call.		The call on the shared line is placed on public hold.
	The call on the shared line is barged in by the other shared line user.	 (Local SCA Phone)  (Other Phone)	The call on the shared line is placed on private hold.
	In a multi-party call, place the call on hold locally.		

Placing Calls on a Shared Line

You can place one or multiple calls on a shared line.

The phone places a call on the first shared line key automatically. You can select the desired shared line key first and place a call using this key.

Related Topic

[Placing Calls](#)

Answering Calls on a Shared Line

You can answer one or more calls on the shared line.

When an incoming call arrives on the shared line, all the registered phones will ring simultaneously, and the call can be answered on any one of the phones. Incoming calls will be distributed evenly among the available shared line keys.

Note: If the number of incoming calls is greater than the configured line keys, the line keys will be used by sequence circulation. Contact your system administrator for more information.

Related Topic

[Answering Calls](#)

Placing a Call on Public Hold

You can place a call on public hold that any shared line phone can retrieve the held call.

Procedure

1. During a call, press the HOLD key or **Hold**.

Placing a Call on Private Hold

In the SCA scenario, you can place a call on private hold that only you can retrieve the held call.

The **PriHold** soft key can be preset by your system administrator, you can also set a line key as the private hold key manually if the **PriHold** soft key is not available on your phone. You need to configure a private hold key before you place the call on private hold.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Features > Dsskey**.
3. Select the desired line key.
4. Select **Key Event** from the **Type** field.
5. Select **Private Hold** from the **Key Type** field.
6. (Optional.) Enter the string that will display on the phone screen in the **Label** field.
7. Select .

Tip: By default, you can drag the line key to the **Edit** field to set it.

During an SCA call, tap the **PriHold** soft key (You may need to swipe the soft key area left to see the **PriHold** soft key), or private hold key on the phone when there is an active call on the shared line. Then the call is held on your phone, and the other phones registered with a shared line show the call is in the busy state on the shared line key. Other users on the shared line cannot resume your held call.

Retrieving a Held Call on a Shared Line

If you place a call on hold on a shared line, you can resume this call at any time. When the shared line key shows a call that is in a held state, you can resume the held call remotely from other user's phone.

Before You Begin

There is at least one call placed on public hold on the shared line.

Procedure

1. Do one of the following:

- Select .
- Long tap the desired line key.

*The **Cancel**, **CallPull**, **NewCall** and **Retrieve** soft keys appear on the touch screen.*

Select **Retrieve** to retrieve the call.

Barging in an Active Call on a Shared Line

In the SCA scenario, you can barge into an active call on the shared line. After you barge into a call, the call turns into a three-party conference.

Note: Only one user can barge into an active call on the shared line at a time.

Before You Begin

There is at least one active call on the shared line.

Procedure

1. Long tap the desired line key.

The **Cancel**, **CallPull**, **NewCall** and **Barge In** appear on the screen.

2. Select **Barge In** to interrupt the active call.

Pulling a Shared Call on a Shared Line

In SCA scenario, both you and other users can pull an existing call from another shared phone that is in an active or hold state.

Check with your system administrator to find out if this feature is available for your phone.

Before You Begin

There is an active or held call on the shared line.

Procedure

1. Long tap the shared line key.

2. Select **CallPull** to pull the call.

Intercom

Intercom is a useful feature in an office environment to quickly connect with the operator or the secretary.

Intercom enables you to place an intercom call that is answered automatically on the contact's phone as long as the contact is not in an active call.

Note: Intercom is not available on all servers. Contact your system administrator for more information.

Topics

[State Indicator of the Intercom key](#)
[Placing an Intercom Call](#)
[Picking up an Incoming Call of the Target Extension](#)
[Answering an Intercom Call](#)

State Indicator of the Intercom key

You can get the intercom status by viewing the icon indicator of the Intercom key.

Icons	Description	Icons	Description
	Target extension is available.		Target extension is ringing.
 Callout	Target extension is dialing.	 Talking	Target extension is busy or is in a call.
	Target extension fails to register.		

Placing an Intercom Call

You can place an intercom call to quickly relay a message to a contact.

The target phone plays a warning tone and automatically answers the call in speakerphone (hands-free) mode by default. When the target phone has an active call, the intercom call is answered automatically after the active call ends.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Features > Dsskey**.
3. Select the desired line key.
4. Select **Intercom** from the **Type** field.
5. Select the desired line from the **Account ID** field.
6. Do one of the following:
 - (Optional.) Enter the string that will appear on the phone screen in the **Label** field.
Enter the target extension number in the **Value** field.
 - Select  and select the desired contact.
7. Select .
8. Tap the Intercom key to place an intercom call.

Tip: By default, you can drag the line key to the **Edit** field to set it.

Related Topic

[Setting a BLF Key](#)

Picking up an Incoming Call of the Target Extension

You can pick up the target extension's incoming call by pressing the Intercom key.

Before picking up an incoming call, make sure that the directed call pickup code has been configured either for an Intercom key or for Call Pickup feature in advance.

Check with your system administrator to find out if this feature is available on your phone.

Note: If the directed call pickup code is not set, the phone will place a call to the target extension instead of picking up an incoming call of the target extension when you tap the Intercom key.

Before You Begin

Get the directed call pickup code from your system administrator.

Procedure

1. Drag the Intercom key to the **Edit** field.
2. Enter the directed call pickup code in the **Extension** field.
3. Select .

When the target extension receives an incoming call, the Intercom key icon of the target extension will change to

. Tap the Intercom key to pick up the incoming call directly.

Answering an Intercom Call

By default, when there is an incoming intercom call, the phone plays a warning tone and automatically answer the incoming call.

During the intercom call, you can switch among the Speakerphone (hands-free), Handset and headset modes. If your phone is set to answer intercom calls with your microphone muted, you need to press the Mute key to unmute your microphone before responding to the call.

You can configure the following behaviors when receiving an intercom call.

Intercom Allow

Intercom Allow feature allows the phone to automatically answer an incoming intercom call. If you disable this feature, the phone will reject incoming intercom calls and send a busy message to the caller.

Note: Your system administrator can set a period of delay time before the phone automatically answers intercom calls.

Intercom Mute

Intercom Mute feature allows the phone to mute the microphone when incoming intercom calls are answered automatically.

Intercom Tone

Intercom Tone feature allows the phone to play a warning tone before answering an intercom call automatically.

Intercom Barge

Intercom Barge allows the phone to automatically answer an incoming intercom call while an active call is in progress. The active call will be placed on hold. If you disable this feature, the phone will handle an incoming intercom call like a normal incoming call while there is already an active call on the phone.

Note: To enable the phone to receive a new incoming call when it already has an active call, make sure that the call waiting feature is enabled on the phone in advance.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Features > Intercom**.
3. Make the desired changes.
4. Select .

[Leaving Voice Mails](#)

[Listening to Voice Mails](#)

Setting the Voice Mail Code

If you want to connect your phone to the message center, you need to set the voice mail code on your phone.

Before You Begin

Get the voice mail code from your system administrator.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Select  to launch **Message**.
3. Select **Set Voice Mail Code**.
4. Enter the voice mail code (for example, *4) in the desired account field.
5. Select .

Leaving Voice Mails

You can leave a voice mail to someone who is busy or inconvenient to answer the call.

Procedure

1. Follow the voice prompts to leave a voice mail.
2. Hang up to complete the voice mail.

Listening to Voice Mails

You can listen to your voice mails on the phone, to obtain a voice information sent by a contact.

Before You Begin

You need to set the voice mail code in advance.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Select  to launch **Message**.
3. Select **View Voice Mail**.

The phone screen displays the amount of new and old voice mails. You can tap the account to listen to voice mails.

Tip: When The phone prompts that the phone receives a new voice mail, you can press the MESSAGE key   or select **Connect** to dial out the voice mail access code directly.

Using the Hot Desking

You can use hot desking to log out from the current account and then log in to a new account. So many users can share one phone resource at different times.

Note: Hot desking is not available on all servers. Contact your system administrator for more information.

Before You Begin

Your system administrator has set a Hot Desking key for you to use this feature. Get the login account information from your system administrator.

Procedure

1. Tap the hot desking key when the phone is idle.
The phone prompts you to clear the account configuration or not.
2. Select **OK**.
*Registration configurations of all accounts on the phone will be cleared immediately.
The login wizard will be displayed.*
3. Enter the login information.
4. Select .

Automatic Call Distribution (ACD)

ACD is often used in offices for customer service, such as call center.

The ACD system handles large volumes of incoming calls from callers who have no need to talk to a specific person but who require assistance from any of multiple persons at the earliest opportunity. ACD on all IP phones allows the ACD system to distribute large volumes of incoming calls to the registered ACD users.

ACD is not available by default. Check with your system administrator to find out if this feature is available on your phone.

Topics

[Removing a Widget from the Idle Screen](#)

[Creating a Folder](#)

[Renaming a Folder](#)

Adding a Widget to the Idle Screen

The phone provides widgets like analog clock, calendar, digital clock, email and photo gallery. You can conveniently add these widgets to the idle screen as preferred.

Before You Begin

If you want to add an email widget, and you have not registered an APP account, a wizard will be provided for you to set up the email account. If you want to add a photo widget, you need to choose the album or images to be displayed. You cannot add this widget if there are no images in the photo gallery.

Procedure

1. Long tap the empty spot on the idle screen.
2. Tap **WIDGETS**.
3. Touch and hold to pick up a widget.
4. Drag the desired widget up/down/left/right to the destination spot on the idle screen.

Resizing a Widget

Some widgets such as calendar, digital clock and email can be resized on the idle screen.

Procedure

1. Long tap the desired widget for about 2 seconds, and then lift your finger from the screen.

The widget will be with a white frame as shown below:

2. Drag the border of the frame to adjust the size.

Moving an Application or Widget

You can move an application or widget to a different spot on the idle screen or to a different idle screen.

Before You Begin

Before moving an application or widget, you should know the following:

- You can drag an application or widget to the rightmost of the third idle screen to add a new screen.
- If there is only one application or widget on the screen, you cannot add a new screen.
- The idle screen (except the home screen) will be deleted automatically if there is no application or widget on it.

Procedure

1. Long tap the desired item for about 2 seconds.
2. Drag the item up/down/left/right to the destination spot on the screen.

Removing a Widget from the Idle Screen

Removing operation only removes the widget of the application from the screen. The application itself will not be uninstalled.

Procedure

1. Long tap the desired item for about 2 seconds.

The **Remove** field will appear on the top of the phone screen.

2. Drag the item to the **Remove** field to remove it.

Creating a Folder

You can create a folder to organize your applications. For example, you can place the same kind of applications in a folder.

Procedure

1. Drag an application icon over another application icon.

2. Lift your finger when a folder frame appears around the applications.

A new folder containing the selected applications is automatically created.

The folder will be deleted automatically if there is only one application in the folder.

Renaming a Folder

You can rename a folder to make it easier to be recognized.

Procedure

1. Tap the desired folder to expand the folder.

2. Tap the **Unnamed Folder** field.
3. Enter the desired folder name.
4. Tap **Done** on the onscreen keyboard.
5. Tap the blank area of the phone screen.

The folder name is renamed.

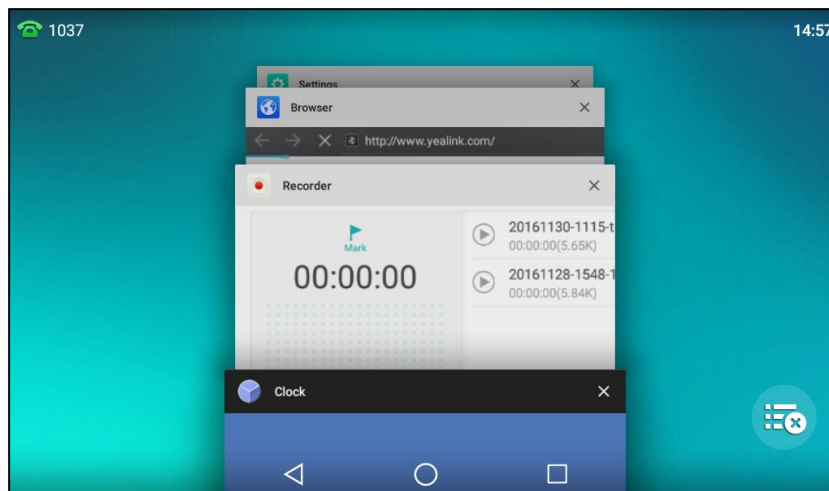

Managing Running Applications

You can tap to view and manage the list of recently used applications that are still running in the background.

Procedure

Do one of the following:

- Swipe the desired application left or right to stop the running application.
- Tap  to stop all running applications.
- Tap the desired application to access the application.

If there are no running applications, the phone screen will prompt “Your recent screens appear here”.

APP Accounts

Before using **Email** and **Calendar**, or you want to sync contacts with Google, you need to register an APP account.

Topics

[Adding APP Accounts](#)

[Syncing APP Account Information](#)

[Removing APP Accounts](#)

Adding APP Accounts

You can add Exchange, personal(IMAP), or Google accounts for your **Email** and **Calendar**. The Google account can be also used to sync the Google contacts.

Note: If you cannot add a Google account, contact your system administrator for help installing the core GMS package on your phone.

You can choose the following email account type when adding an APP account. Check with your network administrator for the correct email account settings.

- **POP3:** When using POP3, all emails are stored locally instead of on the server side.
- **IMAP:** When using IMAP, all emails are stored on the server side and you can see them from the phone or other mail clients as well.
- **Exchange:** When using Exchange, all emails are stored in the central Exchange mail server and can be checked using a compatible mail client such as Microsoft Outlook.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Basic Settings > APP Accounts**.
3. Tap **Add account**.
4. Select the desired APP account type.
5. Register your APP account according to the wizard.

Syncing APP Account Information

After registering the APP account, you can sync the account information if required.

Procedure

1. Swipe left/right to go to the second idle screen.
2. Navigate to **Settings > Basic Settings > APP accounts**.
3. Tap the desired account type.
4. Do one of the following:
 - If you want to sync all accounts, tap  > **Sync now**.

In the following example, it will sync both 11506466499@sina.com and 11506466400@sina.com information.

- If you want to sync a single account, select the desired account. Tap  > **Sync now**.

In the following example, it will only sync 1150466499@sina.com information.

Removing APP Accounts

When you no longer use the current account, you can remove it.

Procedure

1. Swipe left/right to go to the second idle screen.
2. Navigate to **Settings > Basic Settings > APP accounts**.
3. Tap the desired account type.
4. Select the desired account.
5. Tap  > **Remove account**.

The phone prompts you whether to remove the account.

6. Tap **Remove account**.

File Manager

File Manager is a tool that allows you to view, search, delete, copy or move photo/video/audio files. You can also share files via Bluetooth or email. It helps you to access and manage files in the internal SD card as well as USB flash drive.

Topics

[Viewing Files](#)
[Searching Files](#)
[Copying Files](#)
[Cutting Files \(Moving Files\)](#)
[Uploading Files](#)
[Deleting Files](#)
[Sharing Pictures/Videos/Audio via Bluetooth](#)
[Sharing Pictures/Videos/Audio via Email](#)

Viewing Files

You can view photo, video and audio files on your phone.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch **File Manager**.
3. Tap **Photos/Videos/Audios** in the **Local Storage** field.
*If a USB flash drive has been connected to your phone, you can tap **Photos/Videos/Audios** in the **USB Storage** field to view the files stored in USB flash drive.*
4. Tap the desired picture/video/audio to view.

You can also swipe down from the top of the screen to enter the control center, and then tap **USB** to launch **File Manager** to view the files if you have connected a USB flash drive to the phone.

Tip: The menu keys and Android keys will disappear after 5 seconds, you may tap the phone screen to show them again.

Searching Files

By entering search criteria, you can easily find the desired files.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch **File Manager**.
3. Tap  on the top-right of the screen.
4. Enter a search string of the file name.

The phone screen shows the file whose name matches the search string. You can drag up and down to scroll through the searching results, and then tap the desired file to view.

Copying Files

You can copy the files that stored in the USB flash drive to internal SD card, or vice versa.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch **File Manager**.
3. Tap **Photos/Videos/Audios** in **Local Storage** field.
If a USB flash drive has been connected to your phone, you can tap **Photos/Videos/Audios** in the **USB Storage** field to view the files stored in USB flash drive.
4. Select the check box before the desired file.
You can also select the **Select All** check box to copy all files.
5. Tap .

The following prompt will appear on the phone screen:

6. Tap the desired storage device.
7. Tap .

The files are copied successfully with a prompt.

Cutting Files (Moving Files)

You can move the files to other desired path. Once you move the files, they will not be kept in the original storage device any more.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch **File Manager**.
3. Tap **Photos/Videos/Audios** in **Local Storage** field.
If a USB flash drive has been connected to your phone, you can tap **Photos/Videos/Audios** in the **USB Storage** field to view the files stored in USB flash drive.
4. Select the check box before the desired file.
You can also select the **Select All** check box to cut all files.
5. Tap .

The following prompt will appear on the phone screen:

6. Tap the destination storage device.
7. Tap .

The files are cut successfully with a prompt.

Uploading Files

You can upload the files to the server designated by the administrator.

Procedure

1. Swipe left or right to go to the second idle screen.
 2. Tap  to launch **File Manager**.
 3. Tap **Videos/Audios** in **Local Storage** field.
If a USB flash drive has been connected to your phone, you can tap **Videos/Audios** in the **USB Storage** field to view the files stored in USB flash drive.
 4. Select the check box before the desired file.
You can also select the **Select All** check box to cut all files.
 5. Tap .
- The file is uploaded to the server successfully with a prompt.*

Deleting Files

You can delete the useless files to make room for other files.

Procedure

1. Swipe left or right to go to the second idle screen.
 2. Tap  to launch **File Manager**.
 3. Tap **Photos/Videos/Audios** in **Local Storage** field.
If a USB flash drive has been connected to your phone, you can tap **Photos/Videos/Audios** in the **USB Storage** field to view the files stored in USB flash drive.
 4. Select the check box before the desired file.
You can also select the **Select All** check box to delete all files.
 5. Tap .
- The phone prompts you whether to delete the files.*
6. Tap **OK**.

Sharing Pictures/Videos/Audio via Bluetooth

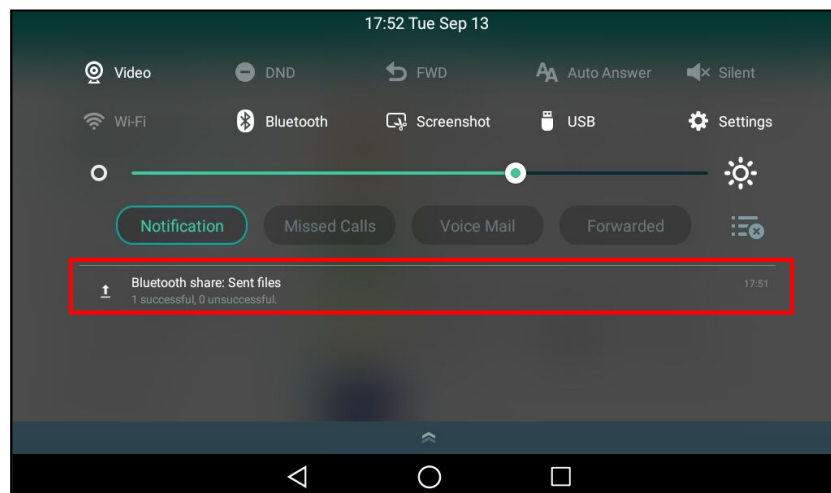

You can share files in the **File Manager** with other Bluetooth devices.

Before You Begin

Make sure the Bluetooth mode is enabled, and the Bluetooth device is discoverable.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch **File Manager**.
3. Tap **Photos/Videos/Audios** in **Local Storage** field.
If a USB flash drive has been connected to your phone, you can tap **Photos/Videos/Audios** in the **USB Storage** field to view the files stored in USB flash drive.
The right of the phone screen shows all pictures/videos/audio.
4. Select the check box before the desired file.
5. Tap .
6. Tap **Bluetooth**, and then select **Always** or **Just once**.
7. If the Bluetooth is deactivated, it will prompt you to tap **Turn on** to activate the Bluetooth mode.
The phone scans and displays the available Bluetooth device automatically.
If there is no Bluetooth device found, navigate to  > **Refresh** to search for the Bluetooth devices.
8. Tap the desired Bluetooth device to share the pictures/videos/audio.
The phone screen will prompt "Sending n file to "XXX"" (n represents the number of the files that are being sent).
9. Accept the request of transferring files via Bluetooth on the Bluetooth device.
If the pictures are successfully transferred, the notification center will display a notification "Bluetooth share: Sent files n successful, n unsuccessful." (n represents the number of files that are sent successfully or unsuccessfully).

You can tap the notification to view the detail information about the shared files.

Sharing Pictures/Videos/Audio via Email

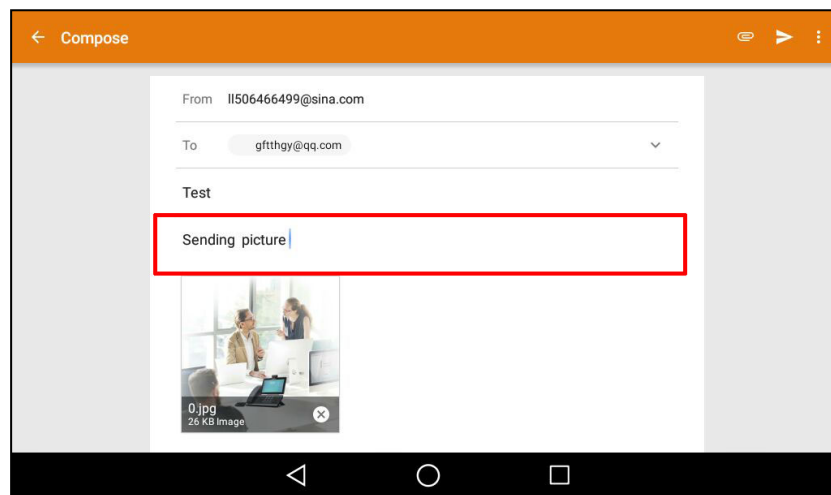

You can share files in the **File Manager** via email on your phone.

Before You Begin

Make sure you have signed in an email account.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch **File Manager**.
3. Tap **Photos/Videos/Audios** in **Local Storage** field.
If a USB flash drive has been connected to your phone, you can tap **Photos/Videos/Audios** in the **USB Storage** field to view the files stored in USB flash drive.
4. Select the check box before the desired file.
5. Tap  .
6. Tap **Email**, and then select **Always** or **Just once**.
7. Compose the email.
8. Enter the email account you want to send the email to in the **To** field.
9. (Optional.) Enter the email subject in the **Subject** field.

10. Tap  to send the email.

The pictures/videos/audio are transferred as a mail attachment.

Note: The attachment size must be within 5MB.

Rotating Pictures

You can rotate the picture as you want.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch the **Gallery**.
3. Tap the desired picture album.
4. Tap the desired picture.
5. Tap  > **Rotate left/Rotate right** to rotate the picture left/right.
6. Tap **SAVE**.

Adding a Filter for Pictures

You can add a filter for the picture to change its display style.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch the **Gallery**.
3. Tap the desired picture album.
4. Tap the desired picture.
5. Navigate to  > **Edit** > .
6. Select the desired filter.
7. Tap **SAVE**.

Adding a Frame for Pictures

You can add a frame for the picture to make it displayed more vivid.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch the **Gallery**.
3. Tap the desired picture album.
4. Tap the desired picture.
5. Navigate to  > **Edit** > .
6. Select the desired frame.
7. Tap **SAVE**.

Cropping Pictures

You can crop a picture to the desired size.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch the **Gallery**.
3. Tap the desired picture album.
4. Tap the desired picture.
5. Navigate to  > **Edit** > .
6. Do the following:
 - Tap **Crop** to resize the picture.
 - Tap **Straighten** to straighten the picture.
 - Tap **Rotate** to rotate the picture clockwise.

- Tap **Mirror** to flip the picture symmetrically.
- Tap **Draw** to draw the picture.

7. Tap **SAVE**.

Coloring Pictures

You can color pictures to make the pictures displayed better.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch the **Gallery**.
3. Tap the desired picture.
4. Navigate to  > **Edit** > .
5. Adjust the desired exposure, contrast, saturation and so on.
6. Tap **SAVE**.

Setting a Picture as Wallpaper

You can set a desired picture as wallpaper to make your phone more personalized.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch the **Gallery**.
3. Tap the desired picture album.
4. Tap the desired picture.
5. Navigate to  > **Set picture as**.
6. Do one of the following:
 - If you want to set the picture as phone wallpaper, tap **Wallpaper**, and then tap **Set wallpaper** on the top-right of the screen.
 - If you connect EXP50 to your phone, tap **Exp Background**, and then tap **Set as exp background** on the top-right of the screen.

Printing Pictures

You can print the desired pictures in the **Gallery**.

Before You Begin

Before printing the picture, make sure your phone has been connected to the network printer. For more information, refer to the documentation from the printer manufacturer.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch the **Gallery**.
3. Tap the desired picture album.
4. Tap the desired picture.
5. Navigate to  > **Print** to print the picture.

Deleting Pictures/Videos

You can delete any useless picture/video from the **Gallery**.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch the **Gallery**.
3. Tap the desired album.
4. Do one of the following:
 - Long tap the desired picture/video.
 - Navigate to  > **Select item**.
 Select the pictures/videos you want to delete.

You can also tap **n items selected** (n represents the number of pictures you selected) and then tap **Select all** to select all pictures.

5. Tap  to delete the selected pictures/videos.
The phone prompts you whether to delete the pictures/videos.
6. Tap **OK**.

Taking a Picture/Video

You can take a picture/video with the **Gallery** directly.

Before You Begin

Make sure you have inserted the camera to the phone.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch the **Gallery**.
3. Tap  on the top-right of the screen.
4. (Optional.) Tap , and then do the following:
 - Tap  to turn on the camera grid.
 - Tap  to configure the camera timer.
5. Swipe right, and then select **Camera** or **Video**
6. Tap  to take a picture or tap  to take video.

Sharing Pictures/Videos via Bluetooth

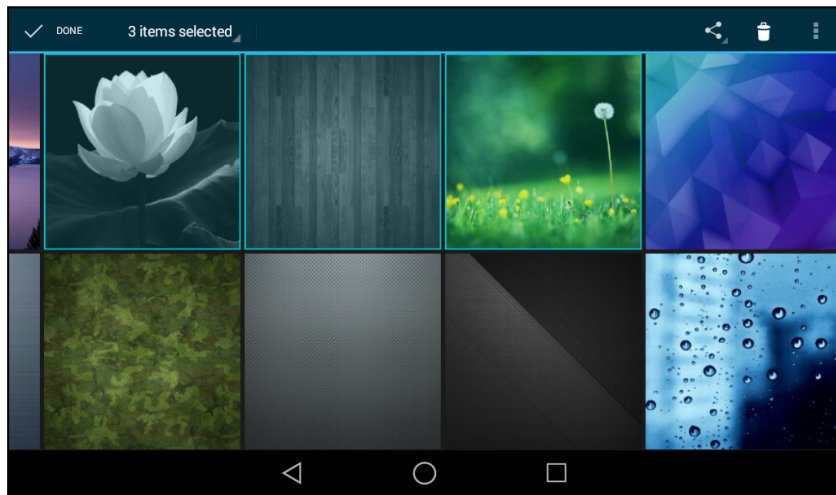

You can share the pictures/videos in the **Gallery** via Bluetooth.

Before You Begin

Before sharing pictures/videos via Bluetooth, make sure the Bluetooth device is discoverable.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch the **Gallery**.
3. Tap the desired picture album.
4. Do one of the following:
 - Long tap one of the pictures/videos.
 - Tap  > **Select item**.
Select the pictures/videos you want to share.

You can also tap **n items selected** (n represents the number of pictures/videos you selected) and then tap **Select all** to select all pictures/videos.

5. Tap , and then select **Bluetooth**.
6. If the Bluetooth is deactivated, it will prompt you to tap **Turn on** to activate the Bluetooth mode.
The phone scans and displays the available Bluetooth device automatically.
If there is no Bluetooth device found, navigate to  > **Refresh** to search for the Bluetooth devices.
7. Tap the desired Bluetooth device to share the pictures/videos.
The phone screen will prompt "Sending n file to "XXX"" (n represents the number of pictures/videos that are being sent).
8. Accept the request of transferring files via Bluetooth on the Bluetooth device.
If the pictures/videos are successfully transferred, the notification center will display a notification "Bluetooth share: Sent files n successful, n unsuccessful." (n represents the number of files that are sent successfully or unsuccessfully).

You can tap the notification to view the detail information about the shared files.

Sharing Pictures/Videos via Email

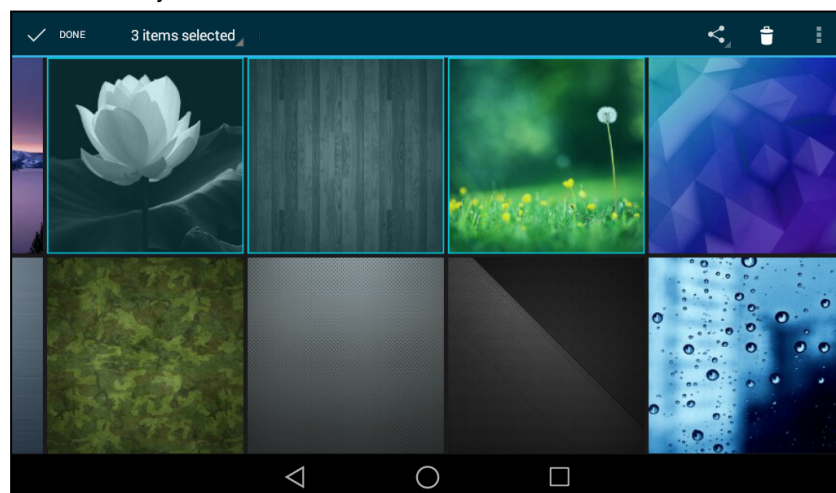

You can share the pictures/videos in the **Gallery** via Email.

Before You Begin

Make sure you have signed in an email account.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch the **Gallery**.
3. Tap the desired album.
4. Do one of the following:
 - Long tap one of the pictures/videos.
 - Tap  and then tap **Select item**.
 Select the pictures/videos you want to share.

You can also tap **n items selected** (n represents the number of pictures/videos you selected) and then tap **Select all** to select all pictures/videos.

5. Tap  and then select **Email**.
6. Compose the email.

7. Enter the email account you want to send the email to in the **To** field.
8. (Optional.) Enter the email subject in the **Subject** field.

9. Tap  to send the email.

The pictures/videos are transferred as a mail attachment.

Note: The attachment files size must be within 5MB.

Recording Audio

By default, the recorded audio is saved in the internal SD card. You can connect a USB flash drive to your phone, the recorded audio will be saved in the USB flash drive instead of the internal SD card.

Note: For more information on how to attach a USB flash drive, please refer to the Quick Start Guide for your phone on [Yealink Support](#).

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch the **Recorder**.
3. Tap  to start recording.
4. Do one of the following:
 - Tap  to pause the recording.
 - Tap  to set a mark.
The icon changes to , the number will increase if you set more marks.
And there is a red flag on this moment when playing.
5. Tap  to end the recording and save the recording.
The recorded audio will be displayed on the right list automatically.

Playing a Recorded Call

You can browse and play back the recordings on your phone.

The recorded calls include a date & time stamp and the other party's number/IP address/name (or the first person's number/IP address/name you called), for example, 20160302-1452-Tom was created on March 2, 2016, at 14:52 and you have a call with Tom. The recorded audio-only calls are saved in ".aac" format and the recorded video calls are saved in ".mkv" format. You can view the recorded files by **Recorder** or **File Manager**. The following is an example of playing the recorded call using the **Recorder**.

Tip: You can also play back the recorded calls on the phone or on a computer using an application compatible of playing ".aac"/".mkv" files.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch the **Recorder**.
3. Tap  before the desired recorded call to play the recorded call.
The length of the recording and a progress bar are displayed as the recording plays.
 You can press the Volume key  to adjust the volume of audio output.

Pause/Resuming a Playback

When you receive an incoming call while playing a recording, the recording is paused automatically. You can resume the playback after handling the call. You can also pause the recording manually at any time.

Procedure

1. Tap  to pause playing the recording. The icon  appears on the phone screen.
2. Tap  to resume the playback.

Fast Forwarding/Rewinding a Playback

While a recorded file plays, you can fast forward or rewind the playback at any time.

Procedure

1. Drag the slider to skip forward the playing or rewind the playing.

If you have set marks for the recorded audio, you can drag the slider to the position with a red flag to listen to the marked moments.

Stopping a Playback

While a recording plays, you can stop playing it at any time.

Procedure

1. Tap  to stop the playing.

Renaming the Recording

You can rename the recording for better recognition.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch **Recorder**.
3. Tap  after the desired recording.
4. Tap **Rename**.
5. Enter the desired file name.
6. Tap **OK**.

Uploading a Recording to Server

You can upload the local recording file to the server designated by the administrator.

Before You Begin

Your system administrator has enabled the recording upload feature for you.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch the **Recorder**.
*The phone shows all recordings in the **Audio Recorder** list.*
3. Tap  after the desired recorded audio.
4. Tap **Upload**.
The file is uploaded to the server successfully with a prompt.

Deleting a Recording

You can delete local recordings or call recordings from **Recorder**. The local recording is named with a prefix “record@” and date & time stamp, while the call recordings are named with the date & time stamp.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch the **Recorder**.
*The phone shows all recordings in the **Audio Recorder** list.*
3. Tap  after the desired recorded audio.
4. Tap **Delete**.
The phone prompts you whether to delete the audio.
5. Tap **OK**.

Deleting All Recordings

You can delete all the recording when you need additional space.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch **Recorder**.

*The phone screen shows all recorded files in the **Audio Recorder** list.*

3. Tap .

The phone prompts you whether to delete all the audio files.

4. Tap **OK**.

Checking Storage Space

You can check the total space or available space of the phone or connected USB flash drive.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Status > Storage**.

Camera

The phone supports taking pictures and recording videos via **Camera**.

The pictures/videos taken by the camera are saved in ".jpg"/".mp4" format with the name consisting of a prefix "IMG/VID" and date & time stamp in the internal SD card. You can view the pictures/videos in the **File Manager**.

You can bookmark a web page so you can access it from the Bookmarks Library directly.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch the **Browser**.
3. Access the web page you want to bookmark.
4. Tap .

5. Edit the details of your bookmark.
6. Tap **OK**.

*The web page is added to the **BOOKMARKS** Library.*

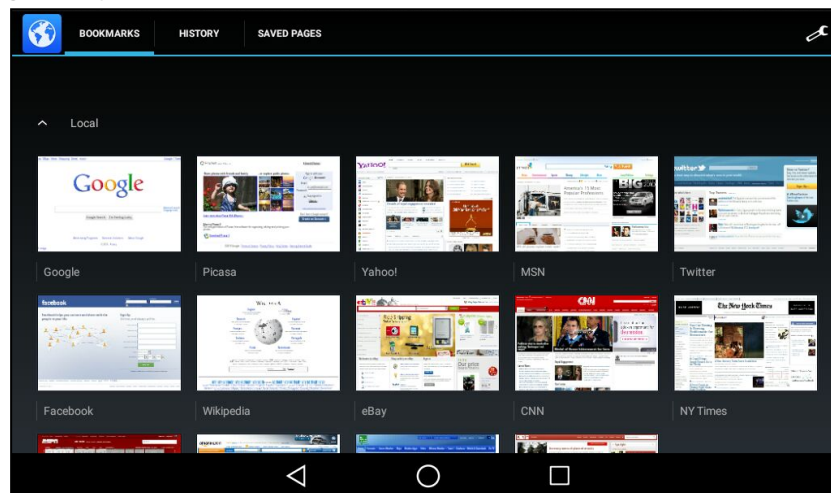

Accessing a Web Page from the Bookmarks Library

You can quickly visit the web page from the Bookmarks Library.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch the **Browser**.
3. Tap  to access the **BOOKMARKS** list.

A list of web pages that you've bookmarked will appear.

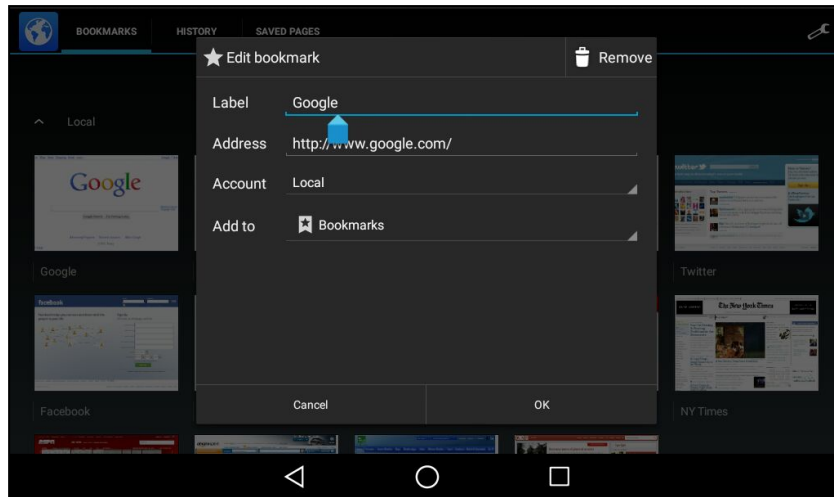

4. Tap the web page you want to visit.

Editing a Bookmark

You can edit the details of your bookmark for better recognition.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch the **Browser**.
3. Tap  to access the **BOOKMARKS** list.
A list of web pages that you've bookmarked will appear.
4. Long tap the bookmark you want to edit.
5. Tap **Edit bookmark** in the pop-up dialog box.
6. Edit the bookmark.

7. Tap **OK**.

Deleting a Bookmark

When you do not need the bookmark any more, you can delete it.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch the **Browser**.
3. Tap  to access the **BOOKMARKS** list.
All pre-configured bookmarks are in the list.
4. Long tap the bookmark you want to delete.
5. Tap **Delete bookmark** in the pop-up dialog box.
6. Tap **OK**.

Setting a Home Page

You can set the web page you visit most frequently as the home page. This web page opens automatically each time you open the browser.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch the **Browser**.
3. Tap  > **Settings** > **General** > **Set homepage**.
4. Tap the web page you want to set as the home page in the pop-up dialog box.

Tip: You can also long tap a web page in **BOOKMARKS** list and then tap **Set as homepage**.

Clearing the Navigation History

You can periodically clear your navigation history to protect your privacy and prevent information disclosure.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch the **Browser**.
3. Navigate to  > **Settings** > **Privacy & security** > **Clear history**.
The phone screen prompts you to delete the browser navigation history or not.

4. Tap **OK**.

Modifying the Browser Settings

You can modify the browser settings to customize your **Browser**.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch the **Browser**.
3. Tap  > **Settings**.
4. Customize the browser style you prefer.

Calendar

You can use the **Calendar** to synchronize events from email account as well as create, modify and view the events.

[Checking Events](#)

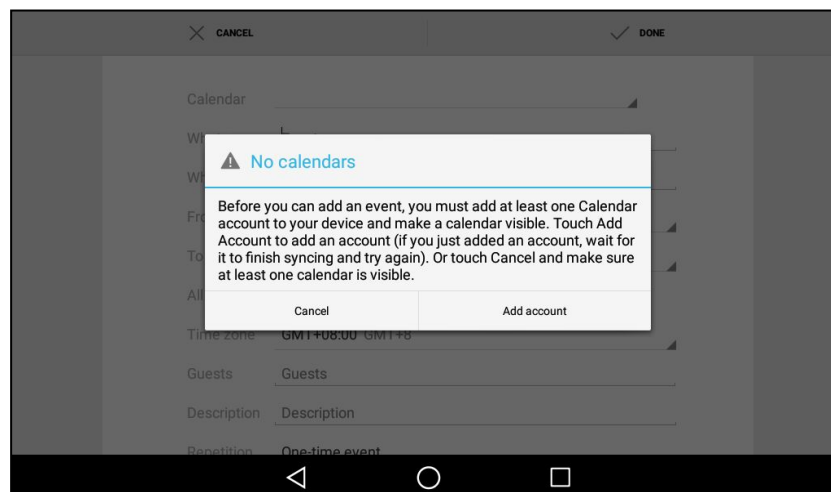

[Modifying the Calendar Settings](#)

Signing Into Calendar

Before creating an event, you should sign into the calendar with an email account first. If you have registered an account on the **Email** already, you can skip this step.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch **Calendar**.
3. Tap .

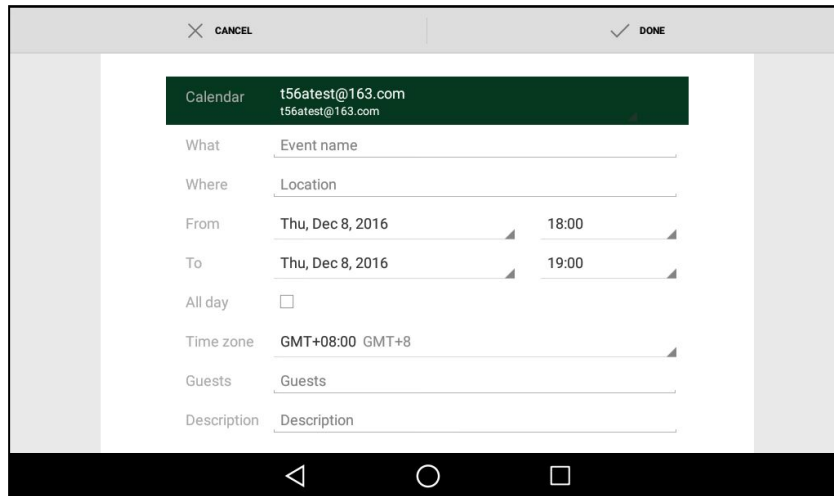

4. Tap **Add account**.
5. Sign into the Calendar according to the setup wizard.

Creating an Event

You can create an event in the **Calendar** to remind you of the important issues.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch the **Calendar**.
3. Select the desired date.
4. Tap .

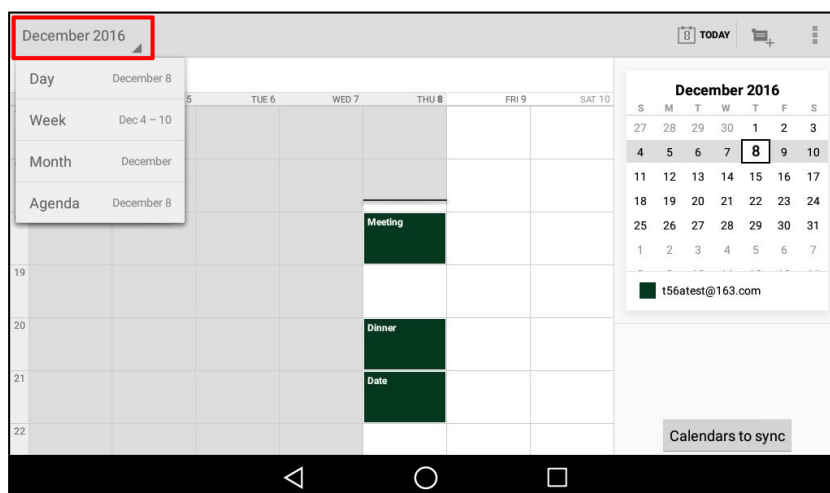

5. Edit the event.
6. Tap **DONE**.

Checking Events

On the calendar, you can check the information about an event you have added.

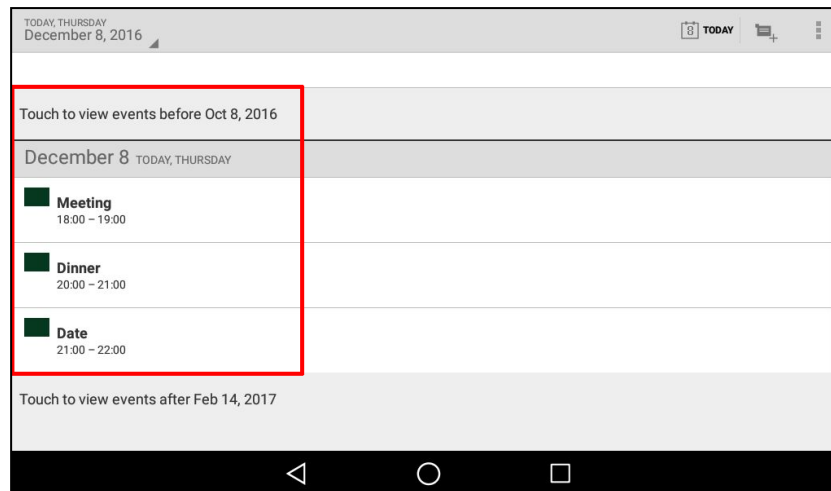

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch the **Calendar**.
3. (Optional.) Tap the current date (for example, ) displayed on the top-left of the phone screen.

Tap **Day/Week/Month/Agenda** to select the time.

In the agenda view, the events you have added are displayed as a list. You can tap **Touch to view events before XXX/Touch to view events after XXX** to view all events.

Modifying the Calendar Settings

You can modify the calendar settings to customize the **Calendar**.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch the **Calendar**.
3. Navigate to  > **Settings**.
4. Customize the general settings and account settings.

Calculator

You can use the **Calculator** to perform simple or complex calculations.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Tap  to launch the **Calculator**.

Clock

You can use the **Clock** to set an alarm, check the time of other cities in the world, set a stopwatch and timer.

Setting an Alarm Clock

To avoid forgetting the important tasks, you can set an alarm clock.

Procedure

1. Tap the digital clock widget on the home screen.
2. Tap  on the top-left of the phone screen.
3. Tap .
4. Tap the desired number to set the alarm time.
5. Tap **OK**.

The alarm clock you have set is displayed on the phone screen.

6. You can do the following:
 - Select the **Repeat** check box, and then tap the repeat day of the alarm.
 - Tap .
 - Select a desired ring tone for the alarm, and then tap **OK**.
 - Tap the **Label** field.
 - Enter a label for the alarm, and then tap **OK**.

Note: If you have set the time format as **12 Hour**, you need to select **AM** or **PM** when setting the alarm time.

Editing an Alarm Clock

According to your needs, you can edit the alarm clocks.

Procedure

1. Tap the digital clock widget on the home screen.
2. Tap .
3. Drag up and down to select the desired alarm.
4. Tap the desired option to edit the alarm clock.

Deleting an Alarm Clock

When you no longer need the alarm clock, you can delete it.

Procedure

1. Tap the digital clock widget on the home screen.
2. Tap  on the top-left of the phone screen.
3. Tap the desired alarm.
4. Tap  on the bottom-left of the alarm to delete the desired alarm.

Setting the Alarm Parameters

You can set the alarm parameters to make your alarm clock more personalized.

Procedure

1. Tap the digital clock widget on the home screen.
2. Tap .
3. Tap  > **Settings**.
4. You can do the following:
 - Tap the desired lasting time of the alarm bell from the **Silence after** field.
The alarm clock will automatically stop after this specified period of time.
 - Tap the desired snooze time from the **Snooze length** field, and tap **OK**.
 - Tap the **Alarm volume** field, drag the slider to adjust the alarm volume and then tap **OK**.
 - Tap the **Volume buttons** field, and then configure the desired function for the Volume key when the alarm is ringing.
 - Snooze:** Press the Volume key  when the alarm is ringing, the alarm will stop and ring after a specified period of time.
 - Dismiss:** Press the Volume key  when the alarm is ringing, the alarm will stop.
 - Do nothing:** Press the Volume key  when the alarm is ringing, the alarm will still ring.

Clock

You can check the current time and date via the clock on the Home screen.

Topics

[Adding the Clock of Other Cities](#)
[Configuring the Clock Display Mode](#)

Adding the Clock of Other Cities

You can add the clock for other cities. After added, you can know the current time in multiple cities simultaneously.

Procedure

1. Tap the digital clock widget on the Home screen.
The phone screen displays the current date and time.
2. Tap .
3. Drag up and down to scroll through the cities.
4. Select the desired city check box.
5. Tap  to return to the clock screen.
The added clock of the desired city is displayed on the phone screen.

Configuring the Clock Display Mode

You can switch the digital clock to analog clock, set the home clock, and home time zone.

Procedure

1. Tap the digital clock widget on the Home screen.
2. Tap  > **Settings**.
3. You can do the following:
 - Select **Analog** from the **Style** field.
 - Select the **Automatic home clock** check box.
 - Select the desired time zone from the **Home time zone** field.

Setting a Timer

You can set a timer to keep you on track to finish something within a set time.

Procedure

1. Tap the digital clock widget on the home screen.
2. Tap .
3. Enter the time by tapping the digits on the right of the screen.
You can tap  to delete the entered numbers.
4. Tap .

When the timer is running, you can do the following:

- Tap  to add an additional minute.
- Tap  to pause the timer.
- Tap  to delete the current timer.

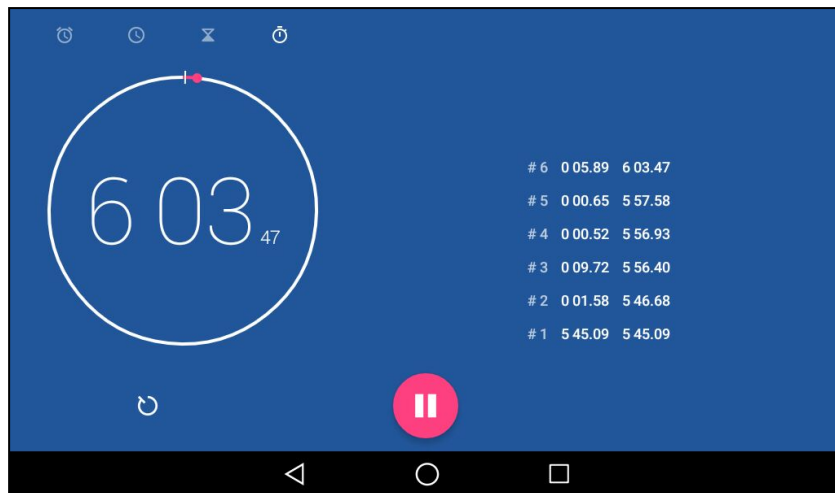

The timer beeps when the time is up. It keeps beeping until you tap to stop.

Setting a Stopwatch

You can set a stopwatch to measure the amount of time that you spend on something.

Procedure

1. Tap the digital clock widget on the home screen.
2. Tap .
3. Tap .
4. You can do the following:
 - Tap  to pause the stopwatch.
 - Tap  to reset the stopwatch.
 - Tap , and then tap Bluetooth or Email to share the record via Bluetooth or email.
 - Tap  to count a lap while the stopwatch is running.

Screen Saver

The screen saver starts automatically when your phone has been idle for the preset waiting time. You can stop the screen saver by pressing any key.

Topics

[Changing the Waiting Time for Screen Saver](#)

[Setting the Screen Saver Type](#)

Changing the Waiting Time for Screen Saver

You can set the waiting time after no activity before displaying the screen saver.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings** > **Basic Settings** > **Display** > **Screen Saver**.
3. Select the desired waiting time from the **Screensaver Waiting Time** field.
4. Select .

Setting the Screen Saver Type

The screen saver can start with different types and you can set it manually.

Your phone supports four screen saver types: **Clock**, **Colours**, **Photo Frame** and **Photo Table**.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings** > **Basic Settings** > **Display** > **Screen Saver**.
3. Select the desired screen saver type.
 - If you select **Clock**, select  to select **Style** or **Night mode**.
 - If you select **Photo Frame**, select  to select the desired photo album(s).
 - If you select **Photo Table**, select  to select the desired photo album(s).
4. Select .

Changing the Screen Backlight and Time

You can change the brightness of the phone screen during phone activity and inactivity.

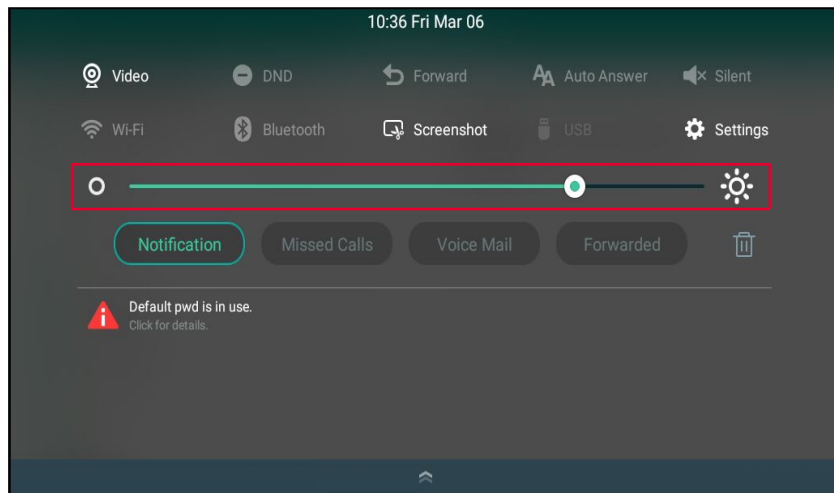

Active Level: The intensity of the phone screen when the phone is active.

Backlight Time: The delay time to change the brightness of the phone screen when the phone is inactive. Backlight time includes the following settings:

- **Always On:** Backlight is on permanently.
- **15s, 30s, 1min, 2min, 5min, 10min or 30min:** Backlight is changed when the phone is inactive after the designated time.

Procedure

1. Swipe down from the top of the screen.
2. Do one of the following:
 - Drag the backlight slider.

When dragging the slider, the control center (except the backlight slider) and notification center will be hidden. You can view the intensity changes of the phone screen in real-time.

If you lift your finger, the control center and notification center will be shown again.

- Tap .

The intensity of the phone screen is changed to the highest.

- Tap .

The intensity of the phone screen is changed to the lowest.

Tip: You can only change the screen intensity during phone activity on the control center. To change the backlight time, navigate to **Settings > Basic Settings > Display > Backlight**.

Changing the Language

Your phone supports several languages that you can choose to use on the phone.

Contact your system administrator to find out exactly which languages are supported on your phone.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Basic Settings > Language & Input > Language**.
3. Select the desired language.
4. Select .

The phone language is changed to the selected one.

Changing the Input Method

The phone supports two kinds of input methods: English (UK) and 谷歌拼音输入法. The default input method is English (UK). You can change the currently used input method.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Basic Settings > Language & Input > Current Input**.
3. Select the desired input method.

You can also long tap the following keys on the onscreen keyboard to change the input method.

For English (UK) input method:

For 谷歌拼音输入法:

Time & Date

You can set the time and date manually. The time and date formats are also variable.

Topics

[Setting the Time and Date Manually](#)

[Changing the Time and Date Format](#)

Setting the Time and Date Manually

If your phone cannot obtain the time and date automatically, you can set it manually.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Basic Settings > Time & Date > General**.
3. Edit the date and time.
4. Select .

The time and date set on the phone will be changed accordingly.

Note: After the phone reboots, it will be forcibly switched to obtain the time and date from the NTP server.

Changing the Time and Date Format

You can set the phone to display the time in 12-hour format or 24-hour format. You can also change the date format, including the options to display the day (D), month (M), and year (Y).

Note: Your system administrator can customize the date format.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Basic Settings > Time & Date > Time & Date Format**.
3. Select the desired time format or date format.
4. Select .

Setting a Key as Send

The pound key (#) is used as the send key by default. To type a phone number followed by the pound key (#), you can set the send key to the star key (*).

You can also disable “#” and “*” to be used as the send key.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Setting > Features > Key As Send**.
3. Select the desired value from the **Key As Send** field.
4. Select .

Phone Lock

Phone lock helps you protect your phone from unauthorized use.

Setting the Phone Lock

You can manually lock the phone or wait a specified time to automatically lock the phone.

When your phone is locked, you can:

- Dial emergency numbers.
- Reject incoming calls.
- Answer incoming calls.
- End the call.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Advanced Settings** (default password: admin) > **Phone Lock**.
3. Select **Enabled** from the **Lock Enable** field.
4. Enter the desired interval (0 - 3600 seconds) in the **Auto Lock** field.
5. Select .

Note: Ask your system administrator for the password if you cannot access Advanced Settings menu.

Locking Your Phone Manually

You can lock the phone manually before the phone is automatically locked.

Before You Begin

Make sure that the phone lock is set.

Procedure

1. Long press # key when the phone is idle.
The lock icon appears on the phone screen.

Related Topic

[Setting the Phone Lock](#)

Unlocking Your Phone

You can use an unlock PIN to unlock the phone.

If you forget the unlock PIN, you can enter the administrator password to unlock your phone, and then automatically access the PIN change screen.

Procedure

1. Tap the screen or tap the locked key, the phone prompts you to enter an unlock PIN.
2. Enter the desired PIN (default: 123) in the **Unlock PIN** field.
3. Select **OK**.

The lock icon disappears from the phone screen.

Changing Your Phone Unlock PIN

The default unlock PIN is “123”. For security reasons, you should change the default unlock PIN as soon as possible.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Basic Settings > Change PIN**.
3. Enter your old and new unlock PIN respectively.
The unlock PIN length must be within 15 digits.
4. Select  .

Line Keys

Line keys allow you to quickly access features such as recall and speed dial. The line key can indicate the monitored status when the line keys are assigned with particular features, such as BLF.

You can assign predefined functions to line keys. You can also define a label for a line key feature which will appear on the phone screen.

Setting a Ring Tone for the Phone

You can choose a ring tone for all incoming calls.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings** > **Basic Settings** > **Sound** > **Ring Tones** > **Common**.
3. Select the desired ring tone.
4. Select .

Setting a Ring Tone for an Account

You can select a unique ring tone for an individual account.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings** > **Basic Settings** > **Sound** > **Ring Tones**.
3. Select the desired account.
4. Select the desired ring tone.

*If **Common** is selected, this account will use the ring tone selected for the phone.*

5. Select .

Setting a Ring Tone for a Group

You can select a unique ring tone for various groups in your Local Directory.

Note: You can only set a ring tone for a group that is added manually.

Procedure

1. Tap  > **Settings**.
2. Select  after the desired group.
3. Select the desired ring tone.
If **Auto** is selected, this group uses the ring tone according to the default priority.
If a specific ring tone is selected, this group uses the ring tone according to the priority: Contact ring tone>Group ring tone.
4. Select **OK**.

Setting a Ring Tone for a Contact

You can select a unique ring tone for various contacts in your Local Directory. This helps you quickly identify callers according to the ring tones.

Procedure

1. Select .
2. Select the contact group first.
3. Select  after the desired contact.
4. Select the desired ring tone from the **Ring** field.
*If **Auto** is selected, the contact uses the ring tone according to the default priority.*
5. Select .

Disabling the Key Tone

If you disable the key tone, the phone will not produce a sound when pressing the keypad keys.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Basic Settings > Sound > Key Tone**.
3. Turn off **Key Tone**.
4. Select .

Enabling Touch Tone

If you enable touch tone, the phone will produce a sound when you tap an option on the phone screen.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Basic Settings > Sound > Touch Tone**.

3. Turn on **Touch Tone**.
4. Select  .

Configuring Notification Sound

The phone will produce a notification sound when receiving a notification (for example, incoming email notification).

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Basic Settings > Sound**.
3. Tap the desired notification sound from the **Notification Sound** field.
4. Select **OK**.

Enabling Silent Mode

If you turn on the silent mode, your phone won't produce a ring tone/key tone/touch sound/notification sound from phone's speaker.

Procedure

1. Do one of the following:
 - Swipe left or right to go to the second idle screen, navigate to **Settings > Basic Settings > Sound**.
Turn on **Silent Mode** and then select  .
 - Press the Volume key  to adjust the ringer volume to the minimum.
 - Swipe down from the top of the screen and toggle **Silent** on.

Note: You may have no permission to turn on the silent mode. Contact your system administrator for more information.

Bluetooth

Bluetooth enables low-bandwidth wireless connections within a range of 10 meters (32 feet). The best performance is in the 1 to 2 meters (3 to 6 feet) range.

You can activate the Bluetooth mode, and then pair and connect the Bluetooth device with your phone. You can pair up to countless Bluetooth devices with your phone; however, you can connect up to two different types of Bluetooth devices at a time. You can also share files with friends via Bluetooth.

You can pair and connect a Bluetooth headset/speakerphone/microphone or a Bluetooth-enabled mobile phone to your phone. And the Bluetooth operating instructions on different Bluetooth devices are the same.

Activating the Bluetooth Mode

You should activate the Bluetooth mode first when you need to connect the Bluetooth device to your phone.

Procedure

1. Do one of the following:
 - Swipe down from the top of the screen.
 - Swipe left or right to go to the second idle screen, navigate to **Settings > Basic Settings > Bluetooth**.
2. Turn on the Bluetooth.

The phone automatically scans the available Bluetooth devices in your area.

The Bluetooth icon appears in the status bar.

Pairing and Connecting the Bluetooth Headset

You can pair and connect the Bluetooth headset to handle calls on the phone.

Before You Begin

Make sure that the Bluetooth headset is discoverable.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Basic Settings > Bluetooth**.
3. Tap  to search for the Bluetooth devices.
4. Tap the desired Bluetooth headset to connect to your phone.

The connection will be completed successfully with a prompt appears under the Bluetooth headset name.

The Bluetooth icon  appears in the status bar.

Related Topic

[Activating the Bluetooth Mode](#)

Pairing and Connecting the Bluetooth-enabled Mobile Phone

When you need to use the phone to handle the mobile phone's calls, you can pair and connect the Bluetooth-enabled mobile phone.

You can only connect one Bluetooth device at a time. After connection, the phone will automatically find an available line key and assign the line key for Mobile Account. The Mobile Account key's default label is "My Mobile". If there is no available line key, you may assign it manually.

Before You Begin

Make sure that the Bluetooth-enabled mobile phone is discoverable.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Basic Settings > Bluetooth**.
3. Tap  to search for the Bluetooth devices.
4. Tap the desired Bluetooth-enabled mobile phone.
5. Tap **Pair** on both mobile phone and phone.

The phone prompts you to sync phone contacts temporarily.

6. Tap **OK** to enable the mobile contacts sync feature and the phone will sync the mobile contacts temporarily, or tap **Cancel** to disable mobile contacts sync feature.

The connection will be completed successfully with a prompt appears under the Bluetooth-enabled mobile phone name.

Note: If you enable mobile contacts sync feature, you also need to authorize the phone to sync the contacts temporarily on the mobile phone.

You can handle a mobile phone call on your phone, the phone acts as a hands-free device for your mobile phone.

The call information appears on both your phone and mobile phone screen. You can control the call's audio to go through the mobile phone or phone on your mobile phone. If you choose Bluetooth, the audio will go through the phone; if you choose Handset earpiece or Speaker, the audio will go through the mobile phone.

Before You Begin

Make sure that the Bluetooth-enabled mobile phone is paired and connected to your phone, and the phone audio feature is enabled.

Procedure

1. Do the following on the phone:
 - Place a call. Tap the **Mobile Account** line key first, and then place a call or multiple calls to the mobile contacts.

- Answer a call. An incoming call to your mobile phone is also shown on the phones, you can answer the call on the phone. The phone will firstly match the contacts in the mobile contacts directory to present the caller identity.
- During the call, you can hold/resume, mute/unmute or end the call on the phone.

Configuring the Media Audio Feature

If a Bluetooth headset is connected to the phone, you can enable the media audio feature to stream the audio from IP phone to Bluetooth headset. The Bluetooth headset acts as the player for the SIP phone.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Basic Settings > Bluetooth**.
3. Select  after the connected Bluetooth headset name.
4. Turn on **Media audio**.
5. Select .

Changing Your Phone's Bluetooth Name

You can change the Bluetooth name for your phone to identify your phone to other Bluetooth devices.

By default, the phone is identified as "Yealink-T58" or "VP59" by other Bluetooth devices.

Before You Begin

Make sure that the Bluetooth mode is activated.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Setting > Basic Settings > Bluetooth > Edit My Device Information**.

3. Enter the desired name in the **Device Name** field.
4. Select .

Renaming the Paired Bluetooth Device

You can rename the paired Bluetooth device to make it recognized more easily.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Basic Settings > Bluetooth**.
The phone screen shows the paired and connected Bluetooth device.
3. Tap  after the connected Bluetooth device name.
4. Enter the desired device name in the **Rename** field.
5. Tap .

*The renamed Bluetooth name will be displayed in the **PAIRED DEVICES** list on your phone. The Bluetooth device name displayed in the scanning list of other devices will not be changed.*

Unpairing the Bluetooth Device

After unpairing the Bluetooth device, next time you activate the Bluetooth, the phone will not automatically reconnect to the device. You need to scan, pair and connect with the device again.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Basic Settings > Bluetooth**.
The phone screen shows the paired and connected Bluetooth device.
3. Tap  after the connected Bluetooth device name.
4. Tap **Unpair**.

Sending Files via Bluetooth

You can use the **Gallery** or **File Manager** to share pictures, videos or audio with an available Bluetooth device in your area.

Related Topics

[Sharing Pictures/Videos via Bluetooth](#)

Receiving Files via Bluetooth

The available Bluetooth devices in your area can share pictures, audio, videos, documents with your phone. You can use the corresponding system application to view the files.

Procedure

1. Share a file with the phone on your Bluetooth device.
The phone will play a notification sound, and the phone prompts you whether to accept the incoming file.
2. Tap **Accept** to start receiving the file.
The phone prompts "The file will be received. Check progress in the Notification panel.". The icon  will be displayed in the status bar.
3. (Optional.) Swipe down from the top of the screen.
Tap the notification "Bluetooth share: Received files".

You can use the corresponding system applications to view the file.

Disconnecting the Bluetooth Device

When you disconnect a Bluetooth device, it remains paired so that you can reconnect it to your phone.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Basic Settings > Bluetooth**.
3. Tap the connected Bluetooth device.
4. Tap **OK**.

Deactivating the Bluetooth Mode

You can deactivate the Bluetooth mode when you no longer use a Bluetooth device.

Procedure

1. Do one of the following:
 - Swipe down from the top of the screen.
 - Swipe left or right to go to the second idle screen, navigate to **Settings > Basic Settings > Bluetooth**.
2. Turn off the Bluetooth.

The Bluetooth icon disappears from the status bar.

Wireless Network

The phone can be connected to the wireless network if Wi-Fi is available within the area.

Note: Enabling Bluetooth may degrade your wireless network connection. For improved wireless network performance, you should disable Bluetooth when it is not in use.

Connecting to an Available Wireless Network Manually

You can use the password provided by your system administrator to connect the phone to a secured wireless network.

Before You Begin

Make sure that the Wi-Fi mode is activated.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Basic Settings > Wi-Fi**.

The phone will automatically search for available wireless networks in your area.

3. (Optional.) To research the available network, select  > **Scan**.
4. Tap the desired wireless network (SSID) to connect to it.
5. Enter the desired password in the **Password** field.
6. (Optional.) Tap  to make the password visible.
7. Select **Show advanced options** to configure the HTTP proxy for the **Browser**.
8. Select **Connect**.

Once the connection has completed successfully, the prompt "Connected" appears under the corresponding SSID.

Related Topic

[Activating the Wi-Fi Mode](#)

Connecting to the Wireless Network Using Wi-Fi Protected Setup

You can connect to the wireless network by using the Wi-Fi protected setup (WPS) to make the connection easier.

The WPS provides simplified mechanisms to configure secure wireless networks. WPS can automatically configure a wireless network with a network name (SSID) and strong WPA data encryption and authentication.

There are two supported methods in the Wi-Fi protected setup:

- **Push Button Configuration (PBC)**: The user simply has to press the WPS key on both the phone and gateway/router to connect.
- **Personal Identification Number (PIN)**: The user enters the PIN generated randomly by the phone on the gateway/router to connect.

Before You Begin

Make sure that the Wi-Fi mode is activated.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Basic Settings > Wi-Fi**.
3. Do one of the following:
 - Select  > **WPS** to use the PBC method, then long press the WPS key on your gateway or router.
Once WPS setup has completed successfully, the phone screen will prompt "Connected".
 - Select  > **WPS-PIN** to use the PIN method, then log into your gateway or router's web interface, and configure it to search the clients. For more information, refer to the documentation from the gateway or router manufacturer.
Once WPS-PIN setup has completed successfully, the web interface of the gateway or router will prompt the connection is successful.

Adding a Wireless Network Manually

If your gateway/router has SSID broadcast disabled, it doesn't appear in the scanning results. Then you must manually add a wireless network.

Before You Begin

Get the available wireless network information from your system administrator. Make sure that the Wi-Fi mode is activated.

Procedure

1. Swipe left or right to go to the second idle screen, navigate to **Settings > Basic Settings > Wi-Fi**.
2. Select  > **Add**.
3. Enter the desired value in the **Network SSID** field.
4. Tap the desired value from the **Security** field.
 - If you select **WEP** or **WPA/WPA2 PSK**, enter the password.
 - If you select **802.1x EAP**, tap the desired value from the **EAP method** field, and enter additional information.
5. (Optional.) Tap  to make the password visible.
6. Select **Show advanced options** to configure the HTTP proxy for the **Browser**.
7. Select **Save**.

Changing the EXP Wallpaper from Phone

You can set the EXP wallpaper to make it more personalized.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Basic Settings > Display > EXP Background > Wallpapers**.
3. Select the desired wallpaper image.
4. Tap **Set as exp background**.

Note: If the size of the custom picture doesn't meet the expansion module screen size, the wallpaper will be stretched or/and zoomed out according to the screen size.

Adding an EXP Wallpaper from a USB Flash Drive

You can use a picture that is stored in your USB flash drive as the EXP wallpaper on your phone.

We recommend that you add a picture less than 4.2 megapixels. Either the smaller or larger picture will be scaled proportionally to fit the screen.

Before You Begin

Make sure that the picture is in the root directory of your USB flash drive, and the USB flash drive is connected to your EXP50 successfully.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Basic Settings > Display > EXP Background > Wallpapers**.
3. Select the desired wallpaper.
4. Select **Set as exp background**.

Using Your Phone with PSTN Account

You can connect an optional expansion PSTN box CPN10 to extend functions of the conference phone. You can make PSTN calls.

Up to 2 cascaded PSTN Boxes can be installed to a conference phone.

Conference

As one PSTN account can only support one call, you need to activate a hook flash to set up a conference.

A hook flash is a quick off-hook/on-hook/off-hook cycle (just like picking up a handset, laying the handset down on the handset cradle, and then picking it up again).

Then the active call will be placed on hold, you are allowed to place a new call and connect three parties in a conference. You cannot view the last participant in the conference call.

You can also set up a conference with more than two parties when you have multiple accounts on the phone. You can view and manage each participant in the conference call.

Note: The way to set up a conference call using hook flash may be different for different gateways/PBX servers.

Procedure

1. Place a call to the first party.
2. When the first party answers the call, select **Flash** to activate a hook flash.
3. Enter the number of the second party.
4. When the second party answers the call, select **Flash** again to join two parties in the conference.
To remove this party from the conference call, select **Flash**.
5. To add an additional party to the conference, select **Conference** (another account is needed).
6. Enter the number of the new party and select **Send**.
7. Select **Conference** when the party answers.

Recording Using a USB Flash Drive

You can use the recording feature when you have connected the PSTN box CPN10.

Placing a DECT Intercom Call with a DECT Intercom Key

You can quickly dial a handset registered to your phone through the DECT Intercom key.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings** > **Features** > **Dsskey**.
3. Tap the desired line key.
4. Select **DECT Intercom** from the **Type** field.
5. Select a target handset from the **Select handset** field.
6. (Optional.) Enter the string that will appear on the phone screen in the **Label** field.
7. Tap .
8. Place a DECT intercom call by tapping a DECT Intercom key when the phone is idle.

Tip: You can drag the line key to the **Edit** field to set a DECT Intercom key.

Performing a Blind Transfer to the Handset

You can quickly transfer a SIP call to the handset registered to your phone.

Procedure

1. When the phone is during a call, do one of the following:
 - Drag the far-site window to a DECT Intercom key.
 - Tap **Transfer**.

Navigate to  > **DECT Intercom**.

Tap the desired handset.

Merging the DECT Intercom Call with SIP Call into a Conference

You can merge the current DECT intercom call with a SIP call into a conference.

Procedure

1. Place a DECT intercom call and a SIP call on the phone.
2. Do one of the following:
 - Drag one far-site window to the other far-site window.
Tap **Conference** from the pop-up box.
 - Tap the desired call for a conference and ensure that the call is active.
Tap **Conference**.
Tap the Hold call to join the conference.

Repeater Mode

Repeater mode extends the radio coverage of the phone. The repeater has the same radio coverage as the base station.

This feature is especially useful for users who require mobility in large dwellings. If the repeater mode is enabled, and a repeater is registered to the base station, the handset registered to the base station can be used either in the base station or the repeater coverage area, thereby providing users with greater freedom in mobility.

The VP59/T58A phone is compatible with DECT repeater RT10/RT20/RT20U/RT30.

[Registering a Repeater](#)

Enabling the Repeater Mode

You have to enable the repeater mode before you register a repeater.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **DECT Settings > Repeater Mode**.
3. Select a repeater from the **Repeater Mode** field.
4. Tap .

The phone prompts you to reboot the dongle or not.

5. Tap **OK**.

The repeater mode is enabled after the dongle reboot.

Setting the Phone to the Repeater Registration Mode

After enabling the repeater mode, you have to set the phone to the repeater registration mode.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **DECT Settings > Handsets**.
3. Tap **Register Repeater**.

The phone is in the repeater registration mode now.

Related Topic

[Enabling the Repeater Mode](#)

Registering a Repeater

You need to register a repeater if you want to extend the radio coverage of the phone.

Before You Begin

The repeater mode is enabled, and the phone is in the repeater registration mode.

Procedure

1. Plug the repeater into an AC outlet.
POWER LED glows green and DECT LED flashes red.
2. Enable the repeater registration mode on the phone.
If a phone is found, DECT LED will flash orange.

When DECT LED glows green/orange, the registration to the phone is successful.

Satellite Mode

You can bind a W53H/W56H handset with the VP59/T58A phone to use the satellite mode.

The phone account is applied to the handset, and all line statuses (for example, DND) on the phone and the handset are synchronized. You can use the phone while you are sitting at your desk, and use the handset while away from your desk to enhance your business activities.

The phone and the handset can share contacts. For more information, refer to [Shared Directory](#).

Satellite mode is available only when one handset is registered. For more information, refer to [Handset Registration](#).

Note: After the handset is bound to your phone, the assigned outgoing/incoming line(s) configured for the handset by your administrator is disabled.

Selecting a Handset to Use the Satellite Mode

You can select a handset to use the satellite mode with the phone, and configure a mode for whether to continue the conversation of the handset when the phone goes off-hook.

There are two satellite modes:

- **Busy:** You cannot switch the active call between the phone and the handset. Regardless of the phone or the handset, the device in a call can initiate a new call. If you are not in a call and try to initiate a call on the phone/handset, the phone/handset screen will prompt "Path Busy".
- **Take over call:** When the handset is during the call, you can retrieve the call from the handset to the phone after off-hook. When the phone is during the call, you can push the call to the handset.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **DECT Settings > Satellite Mode**.
3. Select the desired handset.
4. Select a mode from the **Select mode** field.
5. Tap  .

Adding Shared Contacts

When you add a contact to your Shared Directory, you can set the desired information for your contact. You are required to enter a contact name at least for each new contact.

Procedure

1. Navigate to  > **Share Directory**.
2. Tap .
3. Enter the shared contact's information.
4. Tap .

Viewing Shared Contacts

You can view the shared contacts from the Shared Directory on your phone.

Procedure

1. Navigate to  > **Share Directory**.

Editing Shared Contacts

You can modify or add more information to your contacts.

Procedure

1. Navigate to  > **Share Directory**.
2. Tap  beside the contact.
3. Edit the shared contact information.
4. Tap .

Deleting a Shared Contact

You can delete any contact from the Shared Directory.

Procedure

1. Navigate to  > **Share Directory**.
2. Tap  > **Delete**.
The phone prompts whether to delete the contact.
3. Tap **OK** to delete.

Deleting All Shared Contacts

You can delete all contacts from the Shared Directory.

Procedure

1. Navigate to  > **Share Directory**.
2. Tap **Settings** > **Select All**.
3. Tap .
The phone prompts whether to delete all contacts.
4. Tap **OK** to delete.

Searching for Shared Directory Contacts

In the Shared Directory, you can enter the search criteria to find your desired contact quickly.

Procedure

1. Navigate to  > **Share Directory**.

2. Tap **Search**.
3. Enter the name or number you are looking for in the search field.

The contacts will be displayed in the result list.

Moving a Shared Contact to the Blacklist Directory

You can move a shared contact to the Blacklist directory. The shared contacts added to the Blacklist directory will not disappear, even if you disable the shared directory feature.

Procedure

1. Navigate to  > **Share Directory**.
2. Tap  beside the contact.
3. Tap **Blacklist**.
The phone prompts you to move the contact or not.
4. Tap **OK**.

Saving a Shared Contact to the Local Directory

You can move a shared contact to the Local Directory. The shared contacts added to the Local Directory will not disappear, even after your system administrator disabled the Shared Directory feature.

Procedure

1. Navigate to  > **Share Directory**.
2. Tap **Settings**.
3. Select a contact.
4. Press **Options** and then select **Add To Local**.
5. Tap **New Entry**.
6. Tap .

Placing a Call from the Shared Directory

You can place a call to a contact directly from the Shared Directory.

Procedure

1. Navigate to  > **Share Directory**.
2. Tap the desired contact.
If the selected contact has multiple numbers, tap the desired number.

Renaming the Handset

You can personalize the handset name on the phone.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **DECT Settings** > **Handsets**.
3. Tap  beside the handset name.
4. Enter the desired handset name.
5. Select **OK**.

Locating a Handset

You can locate a misplaced registered handset by the phone.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **DECT Settings > Handsets**.
3. Tap **Start Paging**.

All handsets that are registered to the phone will ring (paging) simultaneously and display the IP address of the phone on the screen.

You can tap **Stop Paging** on the phone to end ringing (paging).

Changing Base PIN

To avoid unauthorized registration or access to some features on the phone, you should keep the base PIN secret.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **DECT Settings > Change Base PIN**.
3. Enter the current PIN (default: 0000) in the **Change Base PIN** field.
4. Enter the new PIN in the **Enter New PIN** and the **Re-enter new PIN** fields.
5. Tap  .

Note: If the double PIN feature is enabled by your system administrator, you can only use the registration PIN to register a handset. Contact your system administrator for more information.

Maintaining Your Phone

When your phone is unable to operate properly, you need to investigate or troubleshoot issues along with other tasks your system administrator may ask you to perform.

Investigating Warnings

The warning icon lets you know that your phone has one or more important issues.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings** > **Status** > **General**.

*The warning detail is displayed in the **Warning** field.*

Clearing Warning Icon

You can temporarily remove the warning icon from the status bar. However, the warning message still is displayed on the **Status** screen until the issue is fixed.

The warning icon appears in the status bar again after reboot if the issue is not fixed.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings** > **Status** > **General**.
3. Tap the **Warning** field.

The phone prompts you to clear the warning icon or not.

4. Tap **OK**.

*The warning icon  is removed from the status bar. And it is also removed from the **Warning** field.*

Tip: You can also swipe left or right to temporarily remove the warning icon via Notification Center.

Diagnosing the Network

When network problems occur on your phone, you can use the "ping" or "trace route" method to troubleshoot network connectivity problems.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings** > **Features** > **Diagnostics** > **Network**.

3. Do one of the following:
 - Select **Ping**, then enter the desired IP address or URL in the **Ping IP or URL** field.
 - Select **Trace Route**, then enter the desired IP address or URL in the **Trace Route IP or URL** field.
4. Select **Start**.

The screen displays the network status information.

Rebooting Your Phone

The improper operation may cause malfunction. If the malfunction occurs, your system administrator may ask you to reboot your phone.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Basic Settings > Reboot > Reboot**.

The phone prompts you to reboot the phone or not.
3. Select **OK**.

Tip: You can also long press the * key on the keypad when the phone is idle to reboot the phone.

Resetting to Factory Settings

When some issues occur on your phone and you have tried all troubleshooting suggestions but still do not solve the problem, you can reset your phone to factory configurations.

This operation will delete all your personal configuration settings, and reset all settings to the factory defaults. Check with your system administrator if the personalized settings are kept before resetting your phone to factory settings.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Advanced Settings (default password: admin) > Reset Config**.
2. Select **Reset to Factory Settings**.

The phone prompts you to reset the setting or not.
3. Select **OK**.

The phone begins resetting.

Tip: You can also long press the Redial key  when the phone is idle.

*After reset, the screen prompts "Welcome Initializing...Please wait".
The phone will be reset successfully after startup.*

Note: Reset of your phone may take a few minutes. Do not power off until the phone has started up successfully.

Updating the Phone Configuration

Your system administrator may ask you to update the configuration for your phone to apply any changes to system settings, which you can do without restarting it.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Basic Settings > Update Configuration**.

3. Enter the provision information in the corresponding field.
4. Select  .
The phone prompts you whether to provision now.
5. Select **OK**.

Clearing User's Personalized Configuration Settings

You can clear the personalized configuration settings manually on the phone.

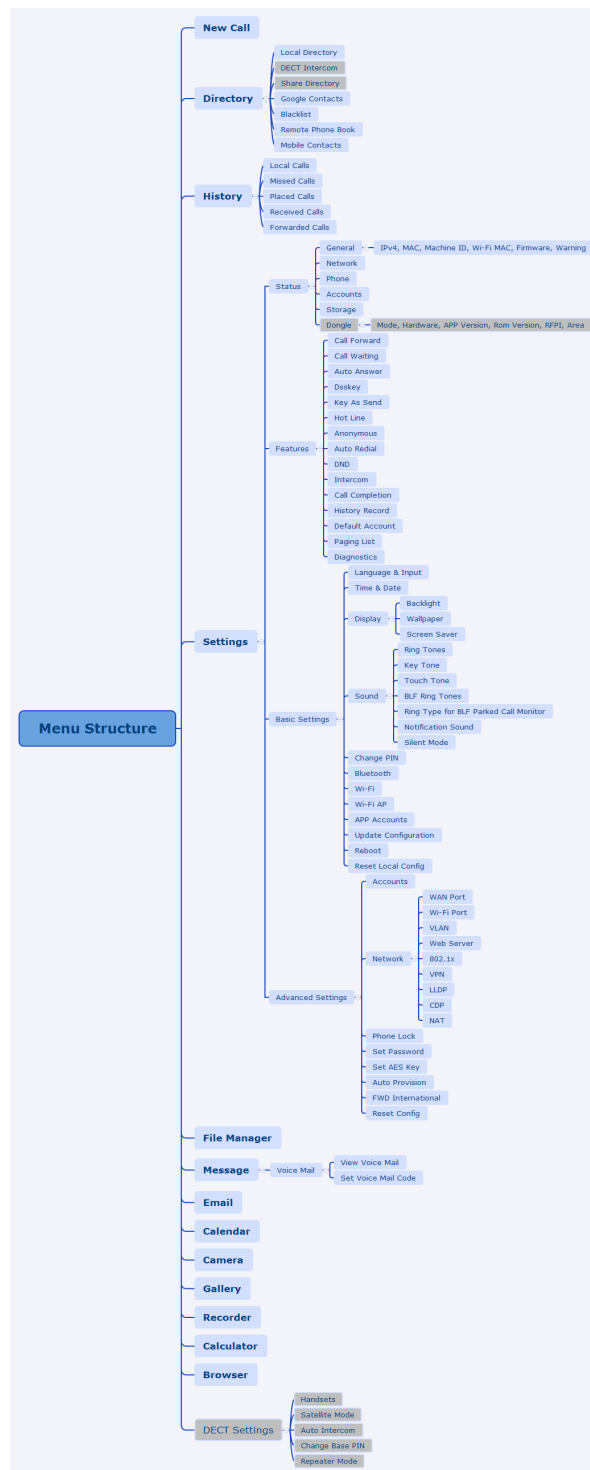

Before You Begin

Your system administrator has enabled the phone to keep the user's personalized settings after auto provisioning.

Procedure

1. Swipe left or right to go to the second idle screen.
2. Navigate to **Settings > Basic Settings > Reset Local Config> Reset local settings**.
The phone prompts you to reset the local settings or not.
3. Select **OK**.

Appendix - Menu Structure

Note: The menus with gray box are not available when the DECT USB dongle DD10K is not attached to the phone.
